

Key Fob

Arming and disarming your system

THE KEY FOB IN A NUTSHELL

This key fob allows you and other users to arm and disarm the alarm. It benefits from innovative hands-free operation. With its automatic user recognition feature, the system is automatically disarmed when you come home. You are also notified when your children arrive home after school. Bye-bye stress! Hello peace of mind!

ADVANTAGES

1. Hassle-free security!

You'll love the convenience of the "hands-free" feature of this key fob. When a door protected by an IntelliTAG™ sensor is opened, if your "Somfy Protect" security system also detects the presence of a user's key fob, it automatically disarms the alarm. No more keypads, codes or false alarms!

2. You can relax, knowing who's entering and leaving your house in real time

Through the "Somfy Protect" application, the key fob allows you to know at all times who is in your house ("presence" feature), and to receive a smartphone notification when your children arrive home after school ("kids" feature).

3. Night mode and panic button

- Night mode allows you to arm only some of the sensors. Your house remains protected, even when you are present.
- The panic button is used to send an alert in the event of an immediate danger (a break-in while you are present and the system is disarmed; you suddenly feel unwell, etc.).
1 long press: an alert is instantly sent to a family member's smartphone.
2 presses: the siren is immediately triggered.

TECHNICAL SPECIFICATIONS

Product reference number	2401489
EAN code	3660849508531
Power supply	1 CR2032 battery included (battery life: 1 year)
Wireless range (Bluetooth)	Up to 50 m (in open air)
Other	Key ring included
