

Indoor motion sensor

Pet-immune

THE INDOOR MOTION SENSOR IN A NUTSHELL

This indoor motion sensor detects and analyzes movements inside your house. It stands out for its ease of installation and use and it's an effective way to complete your "Somfy Protect" security system.

In the event of a break-in, it automatically triggers the alarm and notifies you and your family members on your smartphones.

ADVANTAGES

1. Effective home protection

Small, unobtrusive and efficient, this sensor is your best ally when it comes to home protection. With its wide 130° field of view, it can detect intruders up to 7 metres away. When the slightest presence is detected, it sends you a smartphone alert and automatically triggers your "Somfy Protect" security system's siren.

2. Ideal for pet owners

No more false alarms! It can coexist with your pets (up to 25 kg). Equipped with a sensitivity setting, it watches over your house even when your 4-legged friends are there.

3. Fits in any home

It can simply be placed on a piece of furniture or positioned on a wall thanks to the wall mount provided.
