

Indoor Camera

Protecting your home AND your privacy

THE INDOOR CAMERA IN A NUTSHELL

The Indoor Camera is the first security camera equipped with a motorized shutter, guaranteeing respect for user privacy.

It allows you to keep an eye on your home at all times and listen to and speak with people in your home. It also guarantees effective home protection thanks to the smart motion sensor and real-time alerts.

ADVANTAGES

1. Your house is protected

Thanks to the smart SomfyVision™ infrared motion sensor (infrared and image analysis), you are alerted on your smartphone when the slightest motion is detected. In one click, you can access your images and find out what's happening in real time. If you're busy, your family members can also be alerted.

In the event of a break-in, view and download video recordings for free (10 seconds, available for 24 hours).

2. Your privacy is respected

With the click of your phone, or automatically, the Indoor Camera's motorized shutter will open when you leave your house and close when you come home. You'll have peace of mind knowing that no one can see you!

3. You stay in touch with your loved ones

The free "Somfy Protect" application allows you to see, listen to, or speak with people in your home in real time. You won't miss a thing thanks to its night vision, 130° view and 8x digital zoom.
