A powerful, customizable solution in line with today’s requirements

Create tenders for any building

- You are professional, you know the reliability of radio protocols developed by Somfy. Now, with animeo IP/io we bring this experience to the building and service sector.
- animeo IP/io is a high potential technique compatible with exterior sun protection systems: screens, external Venetian blinds, roller shutters.
- animeo IP/io is backed up by Somfy experience to offer you all the guarantees of the io protocol:
  - Two-directional technology: Blind position feedback is in real time. This exchange simplifies installation, use and maintenance.
  - Multi-frequency technology: animeo IP/io scans 3 frequencies between 868 and 870 MHz and communicates with the best for reliable transmission.
  - Encrypted technology: A 128-bit encryption key gives the system a safety level comparable with bank transactions.
  - Long-range technology: As transmitters use 868 MHz frequency, the open space range is at least 200 meters and at least 20 meters in a concrete construction.

animeo IP/io is a complete solution

- io motors for exterior sun protection applications
- animeo IP – Building Controller WM 100–240 AC
- animeo IP – Sub Controller WM 100–240 AC
- animeo IP USB/io Transceiver
- BMS Interface
- animeo IP visual configuration software

animeo IP/io
Satisfies your requirements

Benefit from simple installation and implementation
animeo IP/io is a radio solution that simplifies your professional life.

Making you more competitive
Now, more than ever, being competitive is key to your business. By offering animeo IP/io to your leads, you will be more competitive.

Helping you develop sales
animeo IP/io gives you new business prospects in the building and service sector.

You get involved in intelligent sun protection system projects: optionally, directly at the investor stage.

You sell complete solutions (building and service). You offer services (maintenance and after-sales) with direct support from Somfy.

Direct control of blinds at any time
Simple configuration and programming is based on using the high-performance, intuitive animeo IP/visual configuration software, requiring no physical intervention on site:

• Configuration and maintenance can be monitored and modified remotely.
• The "Discover functionality" allows you to identify all the animeo IP/io devices installed in the building.
• Using "Floor plan view", you can import plans directly into the software.
• Integration to Building Management Systems through BACnet using the BMS Interface.

Customized to user requirements
Easy-to-use and fulfilling a wide variety of needs, the remote web application gives the animeo IP/io solution complete flexibility:

• The remote web application gives the animeo IP/io solution complete flexibility:
• You can respond to all types of building projects. You offer services that meet today’s requirements: ecological, energy-saving and ensuring occupants’ visual and thermal well-being.

Limited wiring
• animeo IP/io requires 2/3 less wiring than a conventional installation.
• It is always possible to let the occupants control their sun protection locally from their PC through web remote.
• Meeting occupants’ needs
It is always possible to let the occupants control their sun protection locally from their PC through web remote.

Guaranteed connections
With animeo IP/io, you offer equipment designed and manufactured by a brand that you know to be reliable.

• Plug and play connections to eliminate wiring errors.
• It is always possible to let the occupants control their sun protection locally from their PC through web remote.

Somfy’s supervision, equipment and system installation support
Partnerships with an international network of manufacturers, guaranteeing products that are of high quality and fully compatible

Approved Somfy installers worldwide

Protection locally from their PC through web remote.

Somfy takes care of commissioning and manufacturing your sun protection systems (within 12 weeks).

You take advantage of innovative technology that gives you the edge over your competitors.

You can respond to all types of invitations to tender as there is no zone limitation management (per window, per group or per façade).

animeo IP/io gives you decisive arguments to win all types of building projects. You offer services that meet today’s requirements: ecological, energy-saving and ensuring occupants’ visual and thermal well-being.

animeo IP/io is a radio solution that simplifies your professional life.

You can respond to tenders where building management information is required or precise alignment of blinds needs to be guaranteed.

You get involved in intelligent sun protection system projects: optionally, directly at the investor stage.

You offer services (maintenance and after-sales) with direct support from Somfy.

Training for the investor stage, Somfy provides the concrete assistance of its professional network.
