Buildings play a crucial role in adapting to climate change

Commercial buildings account for

35%*

of greenhouse gas emissions in Europe and are subject to regulations to reduce energy consumption.

Managing the levels of daylight and heat entering the building is essential for both its energy performance and for the comfort of occupants. Automated solar shading contributes by using the sun's free energy in winter and protecting against its heat in summer, reducing the need for both heating and air conditioning.

Solar shading professionals have a vital role to play in this fast-changing market and, with significant investment planned in Europe, this sector will generate a wealth of business opportunities.

To help you navigate this opportunity and deliver smarter projects, Somfy has developed Animeo suite.

Animeo suite

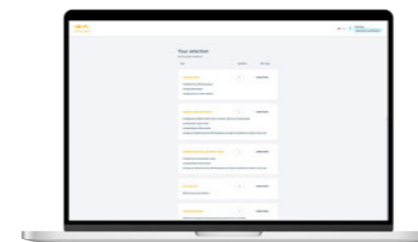

Delivering smart projects for commercial buildings

Animeo suite is an intuitive ecosystem with added value services to automate solar shading for commercial buildings. Create new business opportunities and offer the highest level of service quality and product expertise with Animeo suite. By providing you with a set of three unique tools, Animeo suite enables you to work autonomously and improve efficiency at each stage of your projects, from specification to commissioning, through to monitoring and maintenance.

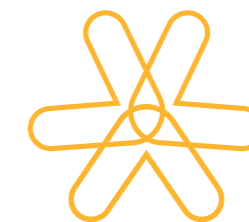

To find out more about becoming a **Animeo Certified Specialist** contact your local Somfy team.

Three tools provide full autonomy and guide you at every stage of projects

 Animeo **select**

Tool for your project configuration. **Specify and sell with ease.**

 Animeo **interface**

Tool for automation design, commissioning and control. **Install and control with ease.**

 Animeo **maintenance by Serv-e-Go**

Tool for project monitoring and maintenance. **Maintain your installations with ease.**

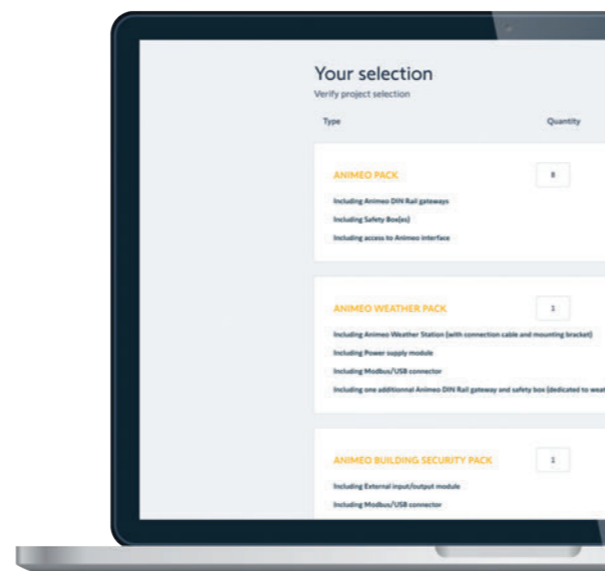

Animeo select

For project configuration

Animeo select helps you configure your projects more easily and also it simplifies your administration tasks and optimises your time.

- Autonomous product selection for Certified Specialists
- Get all project specifications and quotations in one central hub
- Generate a technical report to give you and your client a clear view of the project requirements

Animeo interface

For automation design, commissioning and control

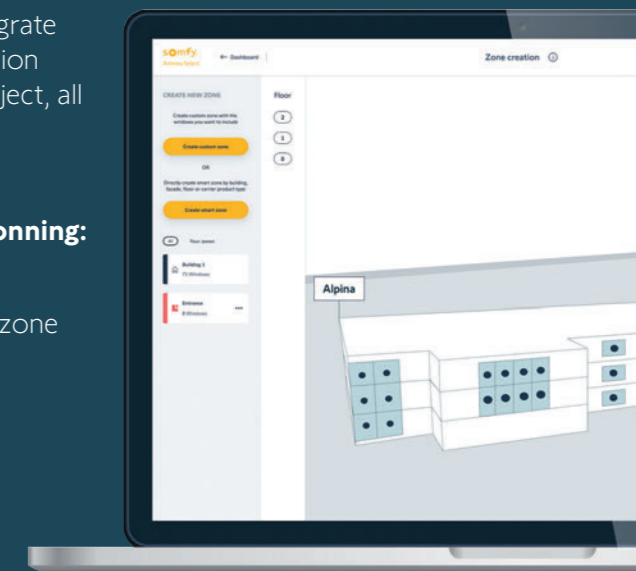

Our intuitive 3D modelling tool enables you to integrate each of the building's windows and create automation rules. So now you can prepare and design your project, all from the comfort of your office.

Prepare your projects before on site commissioning:

- Intuitive and rapid 3D modelling of the building
- Total flexibility including unlimited and automatic zone creation
- A full range of guided automations for security, maintenance, visual and thermal comfort

During on-site commissioning:

- Intuitive pairing of motors and local controls
- Dedicated dashboard for each project stakeholders
- Remote access means you can modify settings from anywhere.

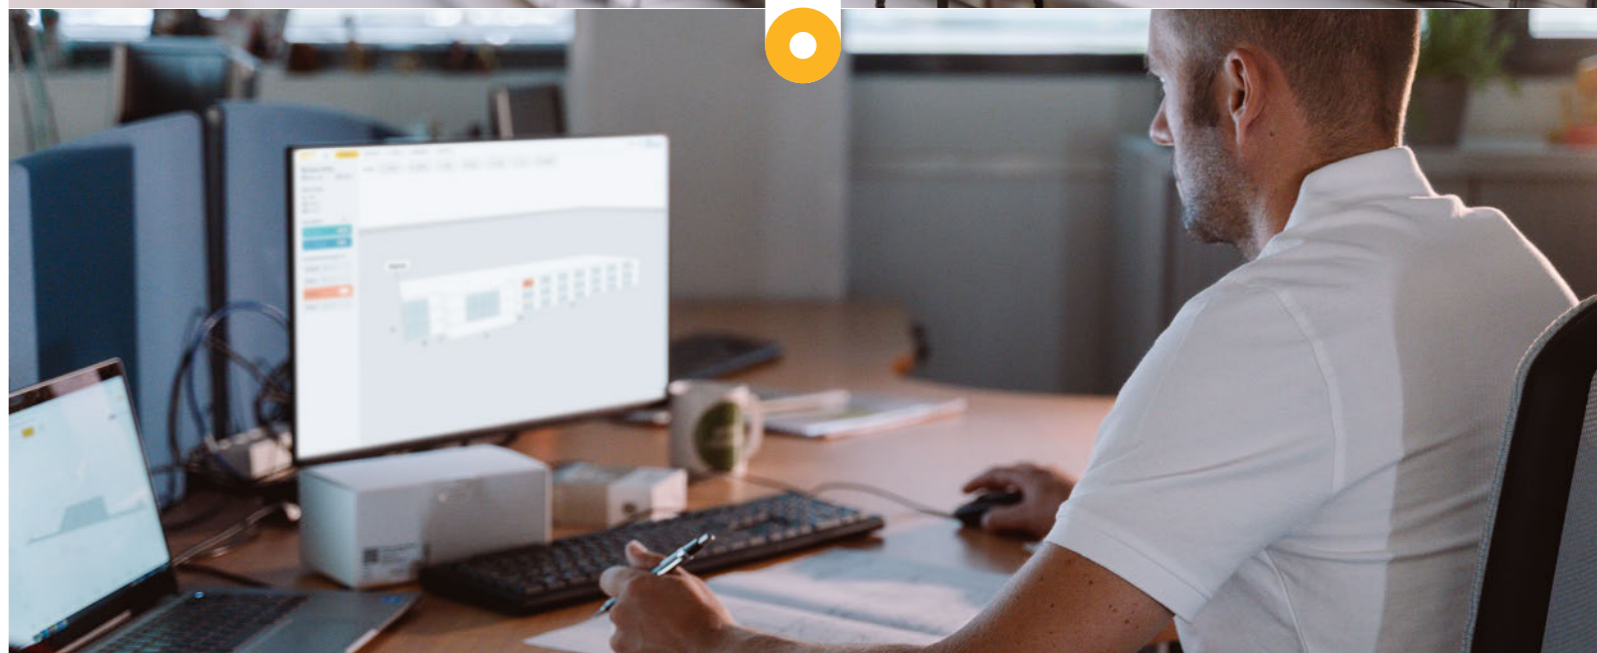

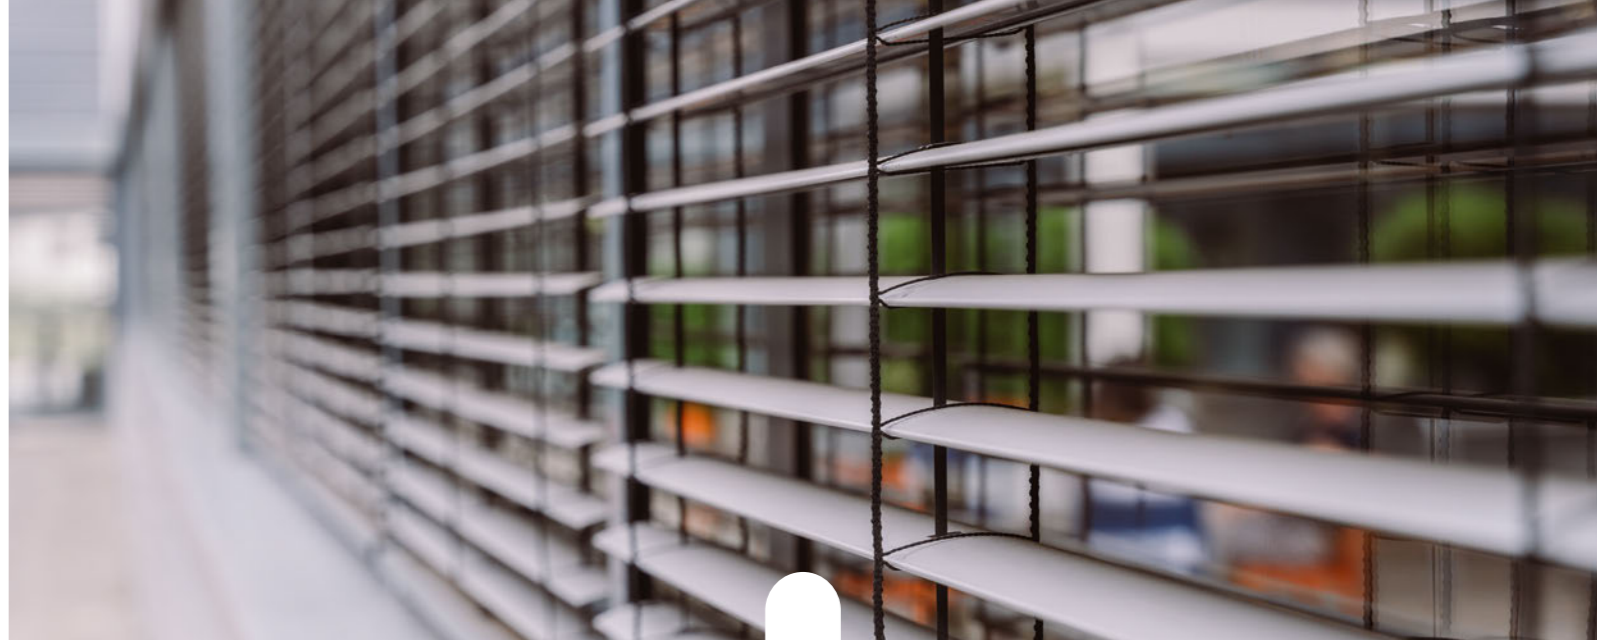

Packs

adapted to each project

STANDARD PACK

Animeo pack
Interface with a central control, priority management and timer
reference 1871451

Safety box for DIN Rail + Animeo DIN Rail + Access to Animeo interface

Building architecture

For your renovation projects, choose io-homecontrol radio technology for all types of buildings.

The simplicity of installation, the performance and the level of security make io-homecontrol® one of the most relevant radio protocols in Europe today. **It offers:**

- **Less wiring**, simpler handling and optimised architecture
- **Flexibility**, should the floorplan or space configuration change
- **Exhaustive feedback**: Order confirmation and equipment position in real time, essential for remote control and maintenance.
- **Reliable, ultra secure 128-bit encrypted radio transmission.**
- **Compatible with a large range of Somfy motors:** to suite all types of projects (renovation or new building)

Roller shutters

Vertical screens

External venetian blinds

Roller blinds
