Centralis Uno IB

**1. General introduction**

1.1 **Centralis Uno IB**

The Centralis Uno IB is an individual control for IB Bus lines. A Centralis Uno IB can be used on its own or in combination with other Centralis IBs or Centralis Uno IBs, to control different devices on different bus lines. The ability to control several devices on the same bus line means a Centralis Uno IB can be used in conjunction with a Centralis IB or with several Centralis Uno IBs.

1.2 **Centralis IB**

The Centralis IB is a general control. Connected to the Centralis Uno IB by the IB bus line, it allows the whole installation to be controlled. It can also be used as a double push button.

1.3 A few definitions

**Installation:** All of the products with which a house is equipped.

**Favourite position:** The favourite position is your ideal position for your roller shutter or awning in certain situations, for example, your awning partially extended when you are watching a movie.

2. **Safety - Important information**

2.1 **Installation and commissioning**

Before installing and using the Centralis IB or Centralis Uno IB, read this guide carefully.

Before installing, ensure that the Centralis IB or Centralis Uno IB, read this guide carefully.

2.2 **Operating**

- Somfy recommends that at least one control point be located close to the roller shutter/awning or group of roller shutters.

- Do not allow children to play with the fixed control points.

- Do not submerge or dip the Centralis IB or Centralis Uno IB in water.

- Only use maintenance products recommended by Somfy.

3. **Contents of the kit and tools required**

3.1 **List of parts**

Before starting installation and commissioning of the Centralis IB or Centralis Uno IB, check that all parts listed in the table below are present in the correct quantity (Q).

8. Using the «O/AUTO» switch

8.1 Auto position

The general control of the IB Bus line (IB) is activated.

8.2 Position O

Only the individual control is activated. It is nevertheless possible to implement general control by pressing the O button. This is done by pressing the Down, Up or STOP button for more than 1 second.

9. Maintenance

- Clean the Centralis IB or Centralis Uno IB with a multipurpose household or window cleaning product.

10. A problem with the Centralis IB or Centralis Uno IB?

- To delete the Favourite position, simply position the roller shutter to the required position.

**7.1 Programming two favourite positions**

1) Press and hold the stop button for 2 seconds. The sealed Centralis Uno IB will remember the current position. (PF).

2) The roller shutter must be in the lowered position. Press the stop button. The roller shutter will go to the Favourite lowered position.

3) If the roller shutter/awning is stationary: A «Favourite position» function: briefly pressing the STOP button sends the roller shutter/awning to the favourite position, if a favourite position has been stored and if the roller shutter/awning is stationary.

4) Press the stop button to stop the roller shutter in the required Favourite position. (PF).

For further information on the «Favourite position» function, visit our website – http://www.somfy.com
