The sensor station extended consists of an aluminum mast with a pre-mounted and pre-wired Outside Sensor Box, 8 sun sensors, 1 wind speed sensor, 1 wind direction sensor, a rain sensor and an outside temperature sensor.

### Installation advantages

- Limited installation time thanks to pre-mounted constructive components and pre-wired individual sensor devices.
- Compass included in delivery for exact positioning of the sensor station.
- Indication of north direction.
- Position of pre-mounted and pre-wired sun sensors is clearly indicated for exact facade orientation.

### Functional advantages

- Only 24 V DC power supply and data need to be connected to evaluate the selected sensor values and display them through the animeo building control solutions.
- Scalable selection of sensor types and quantity through animeo building control solutions.
