The sensor station consists of an aluminum mast with a pre-mounted and pre-wired Outside Sensor Box, 4 sun sensors, 1 wind speed sensor and 1 outside temperature sensor.

The sensor station can be equipped with additional sensors such as sun sensors and a rain sensor.

Installation advantages

> Limited installation time thanks to pre-mounted constructual components and pre-wired individual sensor devices.
> Compass included in delivery for exact positioning of the sensor station.
> Indication of north direction.
> Position of pre-mounted and pre-wired sun sensors is clearly indicated for exact façade orientation.

Functional advantages

> Only 24 V DC power supply and data need to be connected to evaluate the selected sensor values and display them through the animeo building control solutions.
> Scalable selection of sensor types and quantity through animeo building control solutions.
