

# Soliris io

The 230 V powered sun and wind sensor which protects all your sun protections and interior furniture

# Make your life easy

## And enjoy the whole year

### Characteristics

- Power supply: 230 V
- Potential free entry contact for the signal of the rain sensor
- Integrated switch to select the ergonomy of the rain sensor:  
S = security C = Comfort
- Potentiometers to set the threshold values
- Wind threshold can be set from 28 km/h up to 88 km/h (5 Bft - 10 Bft)
- Sun threshold can be set from 0 up to 50 kLux
- Demo-function is integrated
- Working temperature:  
-20°C up to +50°C
- Protection index: IP34

### Advantages

- Offers extra comfort and protects your interior against overheating
- Protects your sun protection against heavy wind and rain
- Together with the Ondeis rain sensor, this sun and wind sensor offers you comfort and safety
  - When there is too much sun, the sun protection opens automatically to offer the consumer extra comfort and to protect the interior against overheating
  - When wind is detected, the sun protection is closed
  - The sun protection can be protected and will be closed when rain is detected. Or to offer more comfort when it's raining, an awning can be opened so that people can stay in the dry while looking to the shop window.
- Fits for applications that can stay open at heavy wind
  - Wind resistant screens
  - Exterior venetian blinds
  - Cassette awning from class 2
  - Pergolas: from version 2021. The compatibility with a 2-way control is needed to set the sun function on the TaHoma.

### Remark

The 2020 version of the Soliris io sensor is not compatible with 2 way controls like the TaHoma, Connexoon io, Nina io and Nina Timer io.
