

Controls & Sensors

A touch of magic in your home

To suit your own wishes...

Eolis RTS

Wireless Wind protection, Can be combined with Somfy tubular motors or receivers for awnings or screens.

- Automatically controls awnings upwards based on the measured wind speed.
- Wind protection, can be combined with remote control and/or wireless switch.
- Simple adjustment of the wind threshold value on the bottom of the sensor.
- Wireless signal transmission, as a result, a minimum of cabling is required.

Sunis Wirefree Sensor RTS

Autonomous sun sensor, Can be combined with Somfy tubular motors and receivers.

- Automatically controls the sun protection up and down based on the measured amount of sunlight.
- When there is too much sunlight, the screen is automatically lowered to provide additional comfort to the consumer and to protect the interior from warming up.
- Simple adjustment of the sun limits on rear sensor.
- Wireless signal transmission, no cabling required.

Situo RTS remote controls

Applicable with Somfy RTS motors.

- Wireless and Simple to program.
- Pulse operation (single press of a button).
- Different versions: Pure (White), Iron, Natural, Arctic

Telis 16 RTS remote controls

Applicable with Somfy RTS motors.

- 16-channel transmitter with display, Easy to program and use.
- Pulse control (single press of a button).
- Timeless design, available in Silver & White.

Smoove Origin RTS

Can be combined with all io-homecontrol® motors and receivers 1 or 4-channel io wall control without feedback.

- For wireless, individual pulse operating control via push buttons
- 1-way operating control, without feedback
- 1 and 4-channel operating control
- On the 4 channel control: possible to select different channels
- Programming button at the back

TaHoma Switch

Switch your home to connected mode
with Somfy Home Automation solutions

Why choose Somfy Smart Home?

> Easy

- Operate your home with the push of a button, wherever you are.
- Adjust the settings as you like, because you always have control of your equipment.

> Accessible

- Somfy Smart Home solutions are wireless, which means they can be used in every home.
- Easy and quick to install - no need to break through walls, etc. All you need is an Internet modem at home and an Internet connection on your smartphone or tablet.

Our partnership
with major brands
offers you a seamless
experience based
on your wants.

• TaHoma Switch

> Expandable

- Somfy Smart Home is easy to expand: Somfy offers solutions for control of blinds and awnings, to control lights and electronic devices, security and for access.

> Connectable

- As part of Somfy's So Open strategy, TaHoma can be connected to several partner companies. Brands such as Google Assistant, Philips Hue, Amazon Alexa, IFTTT, Velux and many more.

From your smartphone, tablet
or PC, at home or at distance

CREATE YOUR CUSTOMIZED AND WELCOMING HOME WITH US.

DID YOU KNOW?

Your window coverings can also be controlled by timers or sensors!
Your curtains can be operated automatically:

At a time set by you
> using the timer.

According to the weather
> using internal and external sensors.
