

SOMFY JOINS FORCES WITH MAJOR PLAYERS ON THE HOUSING MARKET TO OFFER CONSUMERS MORE ENERGY SAVINGS, COMFORT, SIMPLICITY AND SAFETY AT HOME.

## Connected lighting solutions

Philips and Somfy have joined forces to offer users a new vision of home automation thanks to a solution conducive to **comfort at home**. Calling on their respective fields of expertise, Philips hue and Somfy provide complete home equipment control accessible to all: light management has never been as simple or efficient!

Philips hue, the undisputed leader in the field of connected lighting, offers a range of light bulbs that change the way you make use of light.

Philips hue compatible with TaHoma to take the connected house to the next level!

Lighting plays a specific role and now, thanks to the control of different types of light with Philips hue, TaHoma has positioned itself as a resolutely open solution on the market offering users the very best of the connected home.

### FOR YOU AS A PROFESSIONAL, Philips hue products compatible with TaHoma

TaHoma makes it possible to control Philips hue lights in three dimensions to discover all their potential: precise control of colour (16 million colours), brightness and the temperature of white.

After installing a Philips hue bridge provided in the packs, TaHoma is compatible with the following Philips hue products:

#### LIGHT BULBS

E27 coloured bulb

E27 white bulb

GU10 coloured spotlight

#### BLOOM ATMOSPHERE SPOTLIGHTS

Bloom

Hue Go

#### LIGHTING STRIPS

Lighstrip Plus

Lighstrip Plus Extension

#### PHILIPS HUE BRIDGES

V1 bridge

V2 bridge

# THE RIGHT REASONS FOR consumers to choose connected lighting solutions

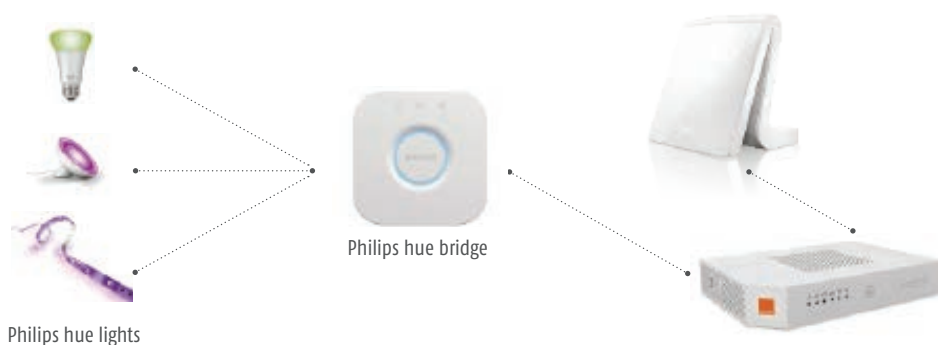

## THE SOMFY® HOME AUTOMATION SOLUTION

The **TaHoma® home automation system** manages the colour, heat and brightness of lights. Ideal for creating lighting atmospheres in every circumstance! Light can be managed at home or remotely via a smartphone, tablet or computer.

### HOW DOES IT WORK?

TaHoma and Philips hue lights are connected via the home Internet box. Philips hue products need a bridge to be able to function. It connects to the Internet box and then dialogues with the Philips hue light bulbs. It can operate up to 50 bulbs.

## CONTROLLING LIGHT WITH TAHOMA

### PERSONALISING IDEAL LIFESTYLE ATMOSPHERES

"Gentle wake-up" scenario: programme a low-intensity warm white combined with partially open shutters.

"Cinema" scenario: Lower the shutters and dim the lights.

"Zen evening" scenario: close all the shutters, activate the alarm and switch the beside light to enjoy a good novel.

### CONTROLLING THE HOUSE AND LIGHTS REMOTELY

Switch everything on or off remotely, even the lights. Simulate the pre-programmed lighting atmospheres.

### THE LIGHTS REACT TO THE STATE OF THE HOUSE

If smoke or an intrusion is detected, programme the red lighting to indicate the problem.

The TaHoma® application is available for Android and iOS.

## Where can you find the products?

Philips hue products are available to professionals via the Somfy e-shop (via [www.somfypro.fr](http://www.somfypro.fr)). Find all the information concerning Philips hue products in the Somfy Professional Guide 2017 (ref. 9002308).

REF	PRODUCT NAMES	DISCOUNT CODE
1822505	E27 hue coloured light bulb	AA
1822509	GU10 hue coloured spotlight	AA
1822511	E27 hue white light bulb	AA
1822565	Hue Go	AA
1822566	Lightstrip Plus 2m	AA
1822567	Lightstrip Plus Extension 1m	AA
1822568	V2 bridge	AA

## Connected roof window solutions

The leading roof window brand, Velux now sells domed windows for flat roofs, window wells, blinds and shutters for roof windows and the associated automation solutions in order to enjoy more fresh air and light as well as controlling light and improving daily comfort.

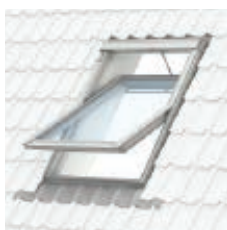

Velux and Somfy have worked together to develop io-homecontrol<sup>®</sup> radio technology with information feedback, shared by the key players on the housing market. Incorporated into a wide range of products that are compatible with one another, it covers the entire house and is very useful for roofs and converted attic space above a mezzanine or a staircase. With intelligent home automation, Velux io-homecontrol<sup>®</sup> roof windows connected to the TaHoma<sup>®</sup> home automation box can even be accessed remotely and will close again at the slightest hint of rain thanks to a series of sensors.

### FOR YOU AS A PROFESSIONAL, Velux products compatible with TaHoma

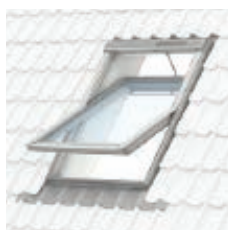

All motorised Velux products and their control systems are fitted with io-homecontrol<sup>®</sup> technology. Several ranges are available depending on the different work site configurations.

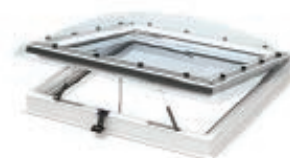

#### ROOF WINDOWS AND DOMED WINDOWS

**GGL / GGU VELUX INTEGRA<sup>®</sup>**  
Motorised roof window, electrical version, ideal for a new installation.

**GGL / GGU VELUX INTEGRA<sup>®</sup> Solar**  
Motorised roof window, solar energy version operating without electrical wiring, ideal for renovation projects.

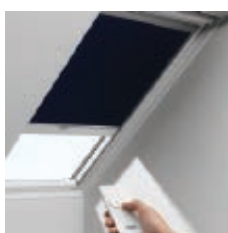

**CVP**  
Electric domed window with motorised opening for flat roofs.

#### SHUTTERS AND BLINDS FOR ROOF WINDOWS

**SML (electric) & SSL (solar)**  
External roller shutters. An ideal addition for roof windows to ensure optimum protection all year round.

**DSL**  
Solar-energy sun blind. For optimum, remote-controlled shading.

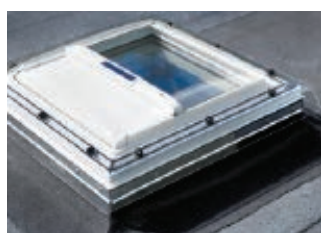

**MML (electric) & MSL (solar)**  
External sun blinds. Direct connection to VELUX INTEGRA<sup>®</sup> windows. Block heat while letting the light through.

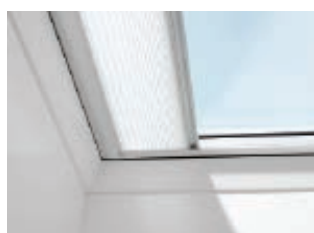

**PML**  
Electric Venetian blind. For optimum light management.

#### BLINDS FOR DOMED WINDOWS

**MSG**  
Solar-energy sun blind. Block 90% of heat in summer.

**FMG**  
Pleated electric dimming blind. To soften daylight. Ideal for living rooms.

# THE RIGHT REASONS FOR consumers to choose connected roof window solutions

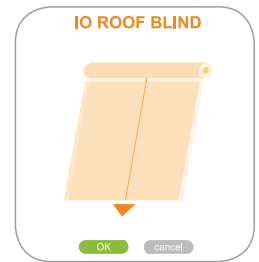

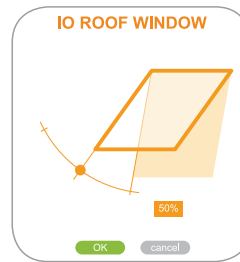

## THE SOMFY® HOME AUTOMATION SOLUTION

The intuitive TaHoma® interface from Somfy makes it possible to control roof windows remotely and to combine them with other equipment by incorporating them into your favourite scenarios.

Compatible Velux products are automatically recognised in TaHoma for precise control of roof windows and their sun protection thanks to Velux expertise.

## HOW DOES IT WORK?

Velux products are controlled by means of io-homecontrol® technology and communicate directly with the TaHoma box or the Somfy io-homecontrol® remote control points.

## io-homecontrol® The radio and home automation standard for housing

- . The latest-generation technology, 100% secure, optimum radio reliability.
- . A protocol shared by all the major names in the housing sector.
- . The magic of real-time information feedback to be sure that your orders have been implemented.

## CONTROLLING ROOF WINDOWS WITH TAHOMA

### DAILY COMFORT

Programme roof windows and sun protections, open blinds slightly to wake up gently. Programme ventilation 20 minutes after waking up to ensure the house is cool and comfortable.

### AIR QUALITY

Improve air quality in the house and programme windows to open for a given time.  
In the event of heavy rain, close windows automatically thanks to rain detectors fitted as standard on motorised Velux roof windows.

### THE IDEAL TEMPERATURE

Choose the ideal temperature, programme roof windows and their sun protections according to the interior temperature and the exposure to the sun.

### TOTAL SECURITY

Whenever you go away, take advantage of the TaHoma scenarios to close windows and shutters, activate the alarm and thus ensure your home is secure.

## Where can you find the products?

Velux products compatible with TaHoma are available from the network of Velux product installers and distributors.

## Connected heating solutions

Hitachi, one of the world leaders in heating and air conditioning and present throughout Europe, provides heating and air conditioning ranges via a network of agencies and exclusive stores ensuring constant quality.

Hitachi and Somfy<sup>®</sup> have decided to combine their know-how in order to offer users increasingly user-friendly solutions boasting even greater energy savings and combining home automation, heating and air conditioning, opening the door to new ways of making use of their home.

It is now possible to control Hitachi heat pumps using the TaHoma home automation box from Somfy and to take advantage of a remote control solution for heating and air conditioning installations.

In 2014, Hitachi began commercialising TaHoma throughout its entire network while training courses were organised for stores and installers.

In 2015, compatibility with air/water heat pumps strengthened the partnership.

### HOW DOES A HEAT PUMP WORK?

**IN SUMMER**, heat inside is pumped outside to keep the house cool.

**IN WINTER**, the heat from the air outside is transferred indoors to heat the house.

**More information:** For more information, please go to: <http://www.hitachiaircon.com/heating/en/>

## FOR YOU AS A PROFESSIONAL, products HITACHI compatible with TaHoma

### AIR / AIR HEAT PUMPS

To heat or cool a room, Hitachi offers you a range of different air/air heat pump solutions which can be adapted to your interior design, the space available and your budget.

#### FITTING 1 ROOM: THE SINGLE ZONE SOLUTION

##### • SELECT 1 HITACHI DESIGN INTERIOR UNIT

###### WALL

Summit / Performance / Shirokuma / Shirokuma S

###### DUCTED

###### CONSOLE

Performance / Shirokuma

###### CASSETTE

##### • CONNECT THE INTERIOR UNIT TO A SILENT AND HIGH-PERFORMANCE EXTERIOR GENERATOR

RAM 130NP6A

RAM 36NP2A  
RAM 53NP2A  
RAM 53NP3A

RAM 68NP3A  
RAM 70NP4A  
RAM 90NP5A

#### FITTING SEVERAL ROOMS: THE MULTI-ZONE SOLUTION

The MultiZONE solution ensures comprehensive home comfort using a single exterior generator. Its flexibility allows it to control up to 6 interior wall, console, ducted or cassette units independently.

### AIR / WATER HEAT PUMPS

The principle involves recovering energy from the air outside to heat water which supplies several types of emitter (heaters, heated floors, etc.). Air / water heat pumps can provide both heating and domestic hot water.

#### HEATING & DOMESTIC HOT WATER SOLUTIONS

Yutaki S  
Yutaki S Combi  
Yutaki S 80

#### DOMESTIC HOT WATER SOLUTIONS ALONE

Yutampo & tank

# THE RIGHT REASONS FOR consumers to choose connected heating solutions

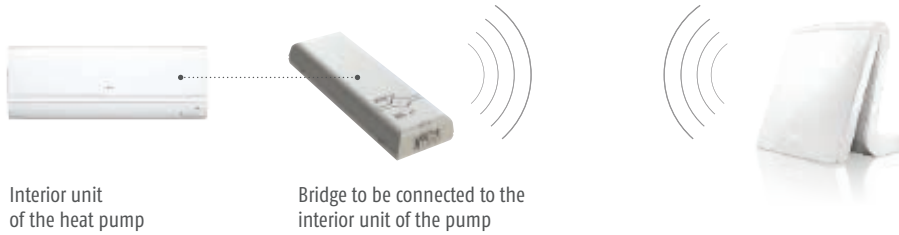

## THE SOMFY® HOME AUTOMATION SOLUTION

The intuitive TaHoma interface from Somfy® makes it possible to manage the heating system and more than 100 household appliances from home or remotely using a tablet or smartphone.

At the push of a button, users can access different heat pump functions (operating mode, start/stop, setpoint temperature, weekly programming, etc.).

## HOW DOES IT WORK?

Interior unit of the heat pump

Bridge to be connected to the interior unit of the pump

The bridge is available from Hitachi stores. It is connected to the heat pump cassette to communicate with TaHoma.

## CONTROLLING THE HEAT PUMP WITH TAHOMA BY SOMFY

### REMOTE CONTROL...

Open the garage door for the deliveryman, close the awning on the terrace if it is raining, switch the heat pump off if you forgot before leaving... And view the status and position of the equipment in real time.

### EVEN MORE ENERGY SAVINGS...

Programme and control your heating and domestic hot water supply remotely, adjust the fan speed, switch equipment off instead of leaving it on standby...

The TaHoma® application is available for Android and iOS.

### CREATE SCENARIOS TO CONTROL MULTIPLE APPLIANCE SIMULTANEOUSLY

For example: the HOLIDAYS scenario: open the roller shutters in the morning, switch a few lights on in the house, close the roller shutters in the evening, activate holiday mode on your heat pump.

### ONE REMOTE CONTROL TO MANAGE IT ALL...

Manage the domestic hot water temperature or the setpoint temperature of a room, open and close all the shutters, blinds, roof windows, etc.

## To find a Hitachi contact point

The installer will select the products best suited to the customers needs and ensure quality installation and after sales follow-up by means of a maintenance contract.

• **A network of installers** trained in Hitachi solutions and specialists in the field of heating and air conditioning.

• **Services for installers:** after-sales, technical assistance, training, logistics

## Connected energy management solutions

A major player in thermal comfort in Europe, Atlantic designs, manufactures and commercialises solutions providing increased comfort and savings while protecting the environment: heating (electric heaters, boilers & heat pumps), domestic hot water (solar-powered and thermodynamic electric water heater), air conditioning and ventilation.

Atlantic and Somfy have joined forces to provide a solution combining Somfy expertise in the field of the connected house and Atlantic's expertise in the field of heating control. Thanks to this partnership, it is possible to enjoy remote control of Atlantic equipment and other home appliances and thus to ensure comfort and household energy management.

### FOR YOU AS A PROFESSIONAL, ATLANTIC products compatible with TaHoma

TaHoma makes it possible to control all Atlantic connected electric heaters which use the io-homecontrol protocol thanks to direct compatibility between the heater and the TaHoma box.

The compatible equipment are part of the following ranges:

#### IRISIUM

Connected heater that can be controlled and programmed by Smartphone

- CORIAN façade with exceptional inertial properties
- Gentle heat and even temperature

#### ONIRIS PI

Connected heater

- Reactivity of the heating element
- Occupancy detector

#### MARADJA PI

Connected heater

- Gentle and enveloping radiation thanks to the heating façade
- An even and inertial temperature

#### GALAPAGOS PI

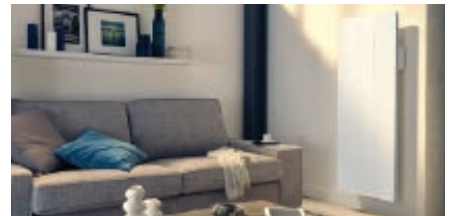

Connected heater

- A gentle, inertial heat similar to the comfort of central heating.
- A classic rounded design

#### CALISSIA

Connected heater

- Heat that can be felt for a long time thanks to the cast iron heating element.

#### TATOU PI

Connected heater

- Quick temperature increase
- Presence detection and automatic detection of window opening and closing

To find out more:

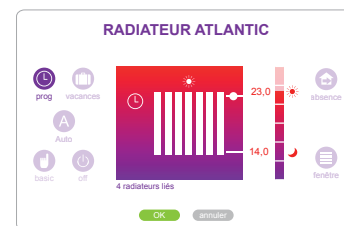

<http://www.atlantic-comfort.com/>

## THE RIGHT REASONS FOR consumers to choose Atlantic connected heaters

### THE ATLANTIC & SOMFY HOME AUTOMATION SOLUTION

The intuitive TaHoma interface by Somfy® is compatible with Atlantic connected heaters. It makes it possible to manage the heating system and control other home appliances (shutters, blinds, etc.); TaHoma can control up to 200 appliances from home or remotely. To optimise household energy performance, benefit from free contributions from the sun in winter and limit heat loss in summer, it is advisable to combine heating programming and window management.

### HOW DOES IT WORK?

Atlantic connected heaters communicate directly with TaHoma thanks to the io-homecontrol protocol. The products are naturally compatible. Once recorded in TaHoma, the heaters can be controlled via a PC or a mobile application.

### PROGRAMME YOUR HEATING ACCORDING TO YOUR HABITS

Thanks to the very simple programming function in TaHoma, you can choose the desired temperature every hour of the day, room by room, according to your habits. Furthermore, thanks to the smart control function of Atlantic connected heaters, the heater can adapt to the lifestyle habits without any control (lower temperature when absent, etc.), thereby generating savings on the heating bill.

### DEALING WITH UNFORESEEN EVENTS

Forgotten something when programming? With a simple click, it is possible to switch modes. This is practical when you have forgotten to set the heating system to eco mode when going in holiday.

The Cozytouch bridge is not required to operate the Tahoma devices.

Thanks to its "window" function, the heater remains switched off if a window is left open in order to avoid energy loss; roller shutters can also be closed via TaHoma.

The TaHoma® application is available for Android and iOS.

Google play

Available on the App Store

## To find an Atlantic contact point

Atlantic heating systems are available from the network of Atlantic installers that is present throughout Europe.

To contact an Atlantic installer, please inform your dedicated sales representative.

## Connected heating solutions

For more than 80 years, Thermor has accompanied European daily life through its expertise in the field of heat. A leading French brand, Thermor designs, develops and manufactures connected heaters and renewable-energy water heaters in France and Europe.

Thermor and Somfy have joined forces to provide a solution combining Somfy expertise in the field of the connected house and Thermor expertise in the field of heating control. Thanks to this partnership, it is possible to enjoy remote control of Thermor equipment and other home appliances and thus to ensure comfort and household energy management.

### FOR YOU AS A PROFESSIONAL, THERMOR products compatible with TaHoma

TaHoma makes it possible to control all Thermor connected products by means of direct compatibility between Thermor appliances and the TaHoma box. They all provide maximum energy savings without your needing to give it a thought thanks to integrated detectors and smart functions (automatic programming, occupancy detection, open/closed window detection).

The following heaters are compatible: 5 HEATERS + 1 PANEL HEATER

#### MYTHIK Connected heater

- Streamlined design, satin aluminium finish
- Gentle, immediate and permanent heat

#### EQUATEUR 3 Connected heater

A gentle, immediate and permanent heat thanks to the double heating system

#### OVATION 3 Connected heater

A gentle, immediate heat thanks to the ultra-reactive heating façade

#### BILBAO 3 Smart connected heater

A gentle, inertial heat tanks to the coolant

#### KENYA 3 Connected heater

A gentle inertial heat thanks to the cast iron heating element

#### EMOTION 3 Smart connected heater panel

Heat by radiation

To find out if the heater is a "connected heater" simply access the settings menu on the digital screen and the connectivity section is indicated.

If you wish to contact a Thermor installer, visit <http://www.thermor-heating.com/>

## Connected energy management solutions

Since 1915, Sauter has developed thermal comfort solutions that reflect consumer expectations.

From producing domestic hot water through ventilation to renewable energies, Sauter develops simple, innovative, energy-efficient solutions accessible to all to enhance daily well-being. Sauter's priority is simplicity, providing a comprehensive solution including services and tools to facilitate the installation and use of appliances.

Sauter and Somfy have joined forces to provide a solution combining Somfy expertise in the field of the connected house and Sauter expertise in the field of heating control. Thanks to TaHoma by Somfy, it is now possible to control Sauter heaters along with other home appliances both from home and remotely and thus to promote comfort and energy savings.

### FOR YOU AS A PROFESSIONAL, SAUTER products compatible with TaHoma

TaHoma makes it possible to control all Sauter connected heaters fitted with the io-homecontrol protocol as they are directly compatible with the TaHoma box.

Compatible Sauter connected heaters are included in the following range:

#### GYALI

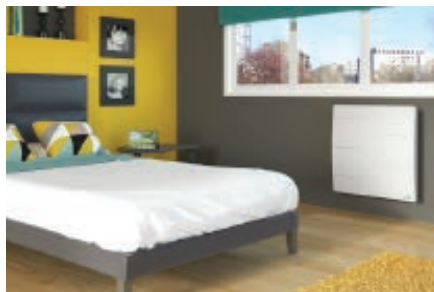

Connected heater

- Even, sustainable heat thanks to the inertia of its heating element.

#### MALAO

Connected heater

- Even, sustainable heat thanks to the inertia of its heating element
- Quick temperature increase thanks heating façade.

#### BOLERO AUTO

Connected heater

- Even, sustainable heat thanks to the inertia of its heating element
- Quick temperature increase thanks heating façade.

## Connected heating and air conditioning solutions

The CIAT group is one of the European leaders in the field of heat pump heating, summer comfort and air treatment. Its activity lies in energy optimisation, air quality improvement and the creation of more comfortable atmospheres with a view to sustainable development and respect for the environment.

Ciat and Somfy have combined their know-how and now offer innovative solutions in the fields of comfort and energy-saving. Thanks to the io-homecontrol protocol, CIAT heat pumps connected to the TaHoma home automation box allow customers to upgrade to a connected house.

FOR YOU AS A PROFESSIONAL,  
products **CIAT** compatible with TaHoma

### XENEA, AIR/WATER HEAT PUMP

For heating needs in new houses with hydraulic heated floors, low-temperature heaters or fan heaters. Combined with a hot water tank, it is available as a "double service" version enabling domestic hot water to be produced at a lower cost.

#### KEY TECHNICAL DATA

- 4 models
- Heating capacity of between 6 and 10 kW
- Performance coefficient of up to 4.1
- NF-certified heat pump equipment
- Operating limits from -20°C / +45°C

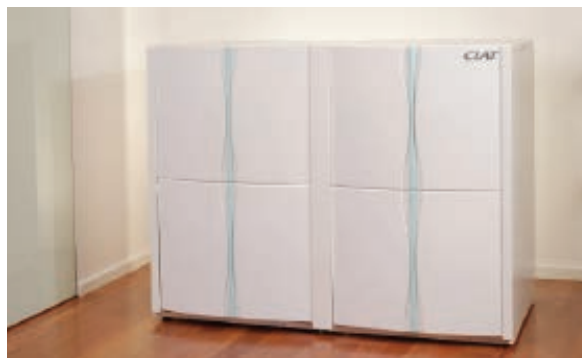

### INNOVATIVE CONTROL

**Xenea and G-Kub** are fitted with Homeconnect radio control: wireless communication by means of io-homecontrol<sup>®</sup> radio technology with integrated weather station.

- - Access to the operating modes and interior temperature settings using a computer, tablet or smartphone via TaHoma.
- - 3 operating mode, weekly programming on 3 levels, absence management
- - Ergonomic, stylish, intuitive.

### G-KUB, GEOTHERMAL HEAT PUMP

An innovative concept combining modularity, performance and design. Assembled in modules (domestic hot water production module or hydraulic module to manage 2 comfort zones), G-Kub provides the end user with tangible solutions to issues of integration, silence, ease of use and performance.

#### KEY TECHNICAL DATA

- 4 models
- Heating capacity of between 6 and 10 kW
- Performance coefficient of up to 6.1
- NF-certified heat pump equipment
- Maximum water output temperature: 62°C
- Operating limits -20°C / +45°C
- Compact design, made in France

## THE RIGHT REASONS FOR consumers to choose connected heating and air conditioning solutions

### THE SOMFY® HOME AUTOMATION SOLUTION

Homeconnect becomes part of the home automation world of the connected house through its interaction with the TaHoma home automation interface developed by Somfy. It allows the desired temperature of the house to be controlled, daily weather trends to be viewed, etc.

Connected by radio technology (io-homecontrol protocol) to the TaHoma box by Somfy, it also makes it possible to adjust the thermal comfort of the house remotely via the Internet or a smartphone.

### io-homecontrol® The radio and home automation standard for housing

- . The latest-generation technology, 100% secure, optimum radio reliability.
- . A protocol shared by all the major names in the housing sector.
- . The magic of real-time information feedback to be sure that your orders have been implemented.

### PROGRAMME AND ADJUST YOUR CIAT HEAT PUMP VIA THE TAHOMA INTERFACE

#### REMOTE CONTROL

With TaHoma by Somfy, control your heat pump (eco, frost protection, off) at the touch of a button via a smartphone or tablet from home or remotely and incorporate it into a scenario.

#### TIMER PROGRAMMING...

Set the timer. For example, open the roof window when you wake up in the morning to air the bedroom, bathroom and living rooms and set the desired temperature automatically.

#### MONITORING ENERGY CONSUMPTION...

Access the real-time heating and domestic hot water energy consumption in real time at any time.

The TaHoma® application is available for Android and iOS.

## Where can you find the products?

CIAT products compatible with TaHoma are available from the network of qualiCIAT installers.

# THE RIGHT REASONS FOR consumers to choose the connected remote surveillance solution

## THE SOLUTION ×

### DUAL PROTECTION

By combining the TaHoma connected house by Somfy and Verisure remote surveillance, you can travel in total peace of mind and your house is doubly protected.

### THE COMFORT OF THE CONNECTED HOUSE

With TaHoma by Somfy, take advantage of the connected house every second of the day, either at home or remotely – it's child's play!

### VERY HIGH SECURITY

With Verisure remote surveillance, you are always protected! Available 24 hours a day, the Verisure remote surveillance post ensures that every alarm is handled in less than 60 seconds.

## HOW DOES IT WORK?

Verisure products interact with products connected to the TaHoma box by means of cloud-to-cloud communication between the two systems.

Communication is secure and transparent to ensure that the two systems act as one.

Alarm activation	Lights out + protection activated
Exterior detection Impact detection	Shutters closed + alarm at the remote surveillance post
Immediate handling by Verisure	Situation controlled + customer informed
Simulation of presence in your absence	Heightened dissuasion

## SECURE AND MANAGE YOUR HOME WITH ×

### READY STEADY GO – YOU LEAVE FOR WORK AT 8 A.M....

The garage door closes behind you automatically, the alarm is activated, the house shutters close, the heating switches to eco mode and the lights go out.

Every access is protected and the Verisure agents in the remote surveillance post monitor your house, ready to intervene at any time.

### HAPPY HOLIDAYS – YOU ARE GOING ON HOLIDAY...

At the touch of a button, you activate the happy holidays scenario. The heating switches to frost protection mode and the alarm is activated. Every day, your presence is simulated automatically. On the other side of the world, you check that all is well at home via your smartphone.

You enjoy your holidays in total peace of mind. The Verisure agents monitor your house 24 hours a day, ready to intervene if necessary. Every access is protected and the Verisure agents in the remote surveillance post monitor your house, ready to intervene at any time.

## Where can you find the products?

The Verisure x Somfy offer is available from the network of Verisure security experts and from Somfy installers.
