

Interior blinds and curtains

MOTORS AND AUTOMATED SYSTEMS
RADIO TECHNOLOGY SOMFY

Let your décor enhance your well-being with Somfy

Window coverings help to form the character of your décor as well as providing privacy and eliminating glare. When motorised and automated by Somfy, they will enhance your well-being for years to come.

p. 6-7
Enhance your day-to-day comfort
wave goodbye to pull cords and control your blinds and curtains with one easy touch of a button.

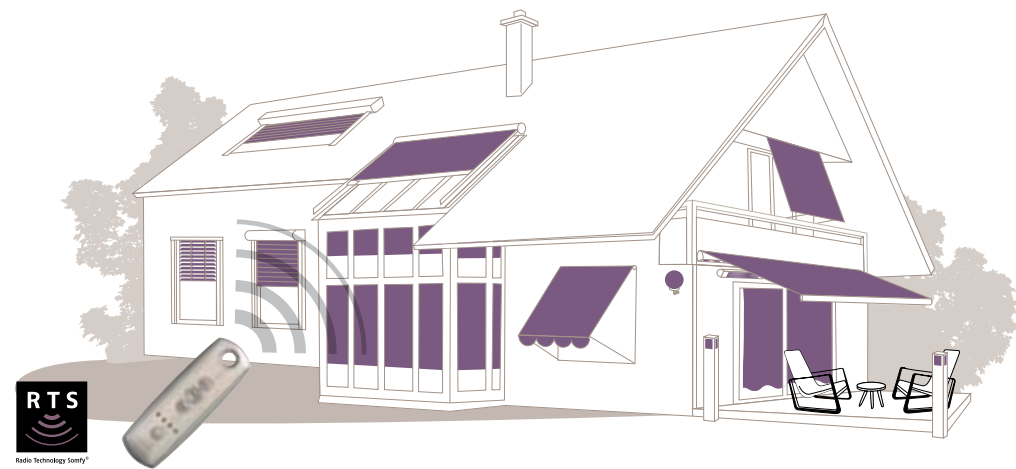

p. 8
Adjust the amount of natural light
using the scroll wheel on the remote control handset.

p. 9
Keep cool and protect your furnishings from the sun's rays.

Radio technology : is a must for effortlessly controlling your interior window coverings

Radio Technology Somfy®

With over 10 million systems installed throughout the world, RTS is the industry standard for radio-controlled window covering solutions.

With its mess-free installation, the system can be expanded to all your windows and doors.

The system is easy to install and as there is no wiring between the control units and motors, your décor remains intact. Radio technology makes it easy to adapt the system at a later date so you can manage all motorised systems remotely (roller blinds, roman blinds, venetian blinds, curtains, external venetian blinds, awnings, garage door, gate, etc.).

What you need to know about motorising window coverings

All types of interior blinds can be motorised.

Whatever type of blind you have, there is a Somfy solution to give you the convenience of motorisation.

Roller blinds

Venetian blinds

Pleated / Cellular
blinds

Curtains

Projection screen /
TV Lift

Converting from manual to motorised is so easy!

It is simple to motorise your blinds, curtains and projection screens without having to change everything or damaging your décor. Talk to our Somfy Expert retailers!

A choice of two power solutions:

Wireless motorisation: battery operated or with a discreet solar panel.

- Recommended for renovation projects or roller blinds, Venetian or fabric blinds.

Standard motorisation: mains powered.

- Recommended for new installations, curtains, large blinds and home cinema screens.

Somfy motors protect your window coverings.

Clean

Opening and closing your curtains electrically will ensure they remain pristine and free of finger marks.

Long-lasting

Your window coverings are operated gently and smoothly and do not become unhooked. The Touch Motion function on the curtain motor protects the mechanism if someone tries to open or close the curtain manually: the motor automatically takes over.

Safe

Child safety is enhanced by eliminating the need for pull cords. You will always be in control of your motorised automated system.

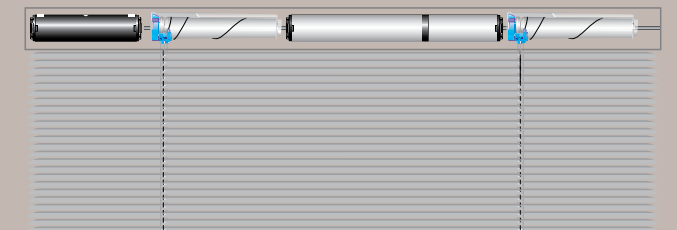

THE SOMFY ADVANTAGE

Reduced noise:
Somfy motors are
near-quiet.

How is a motor installed?

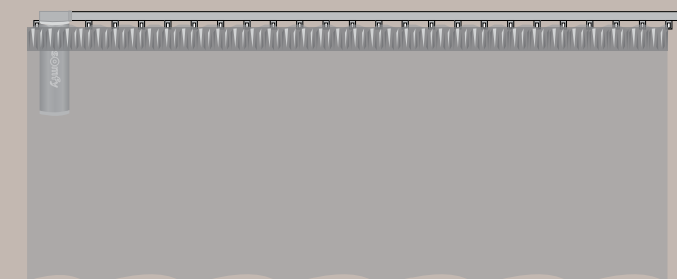

The motorised blind is installed in exactly the same way as a manual blind.

The motor is installed out of sight in the blind headrail or roller tube. The system is very easy to configure and the blind can be used immediately.

The curtain fabric simply hooks onto a curtain track on which the motor is installed.

The motorised curtain track is designed to blend in with the décor. There is a choice of side or centre opening.

Your window coverings can also be controlled by timers or sensors!

Your blinds and curtains can be operated automatically:

At a time set by you
> using the timer.

According to the weather
> using internal and external sensors.

A VISION OF Home Motion

ACCESSIBLE | UPGRADABLE & CUSTOMISABLE | EASY TO USE | EASY TO INSTALL

Simplicity, ergonomics and acoustic performance are the driving forces behind our motors and controls designs.

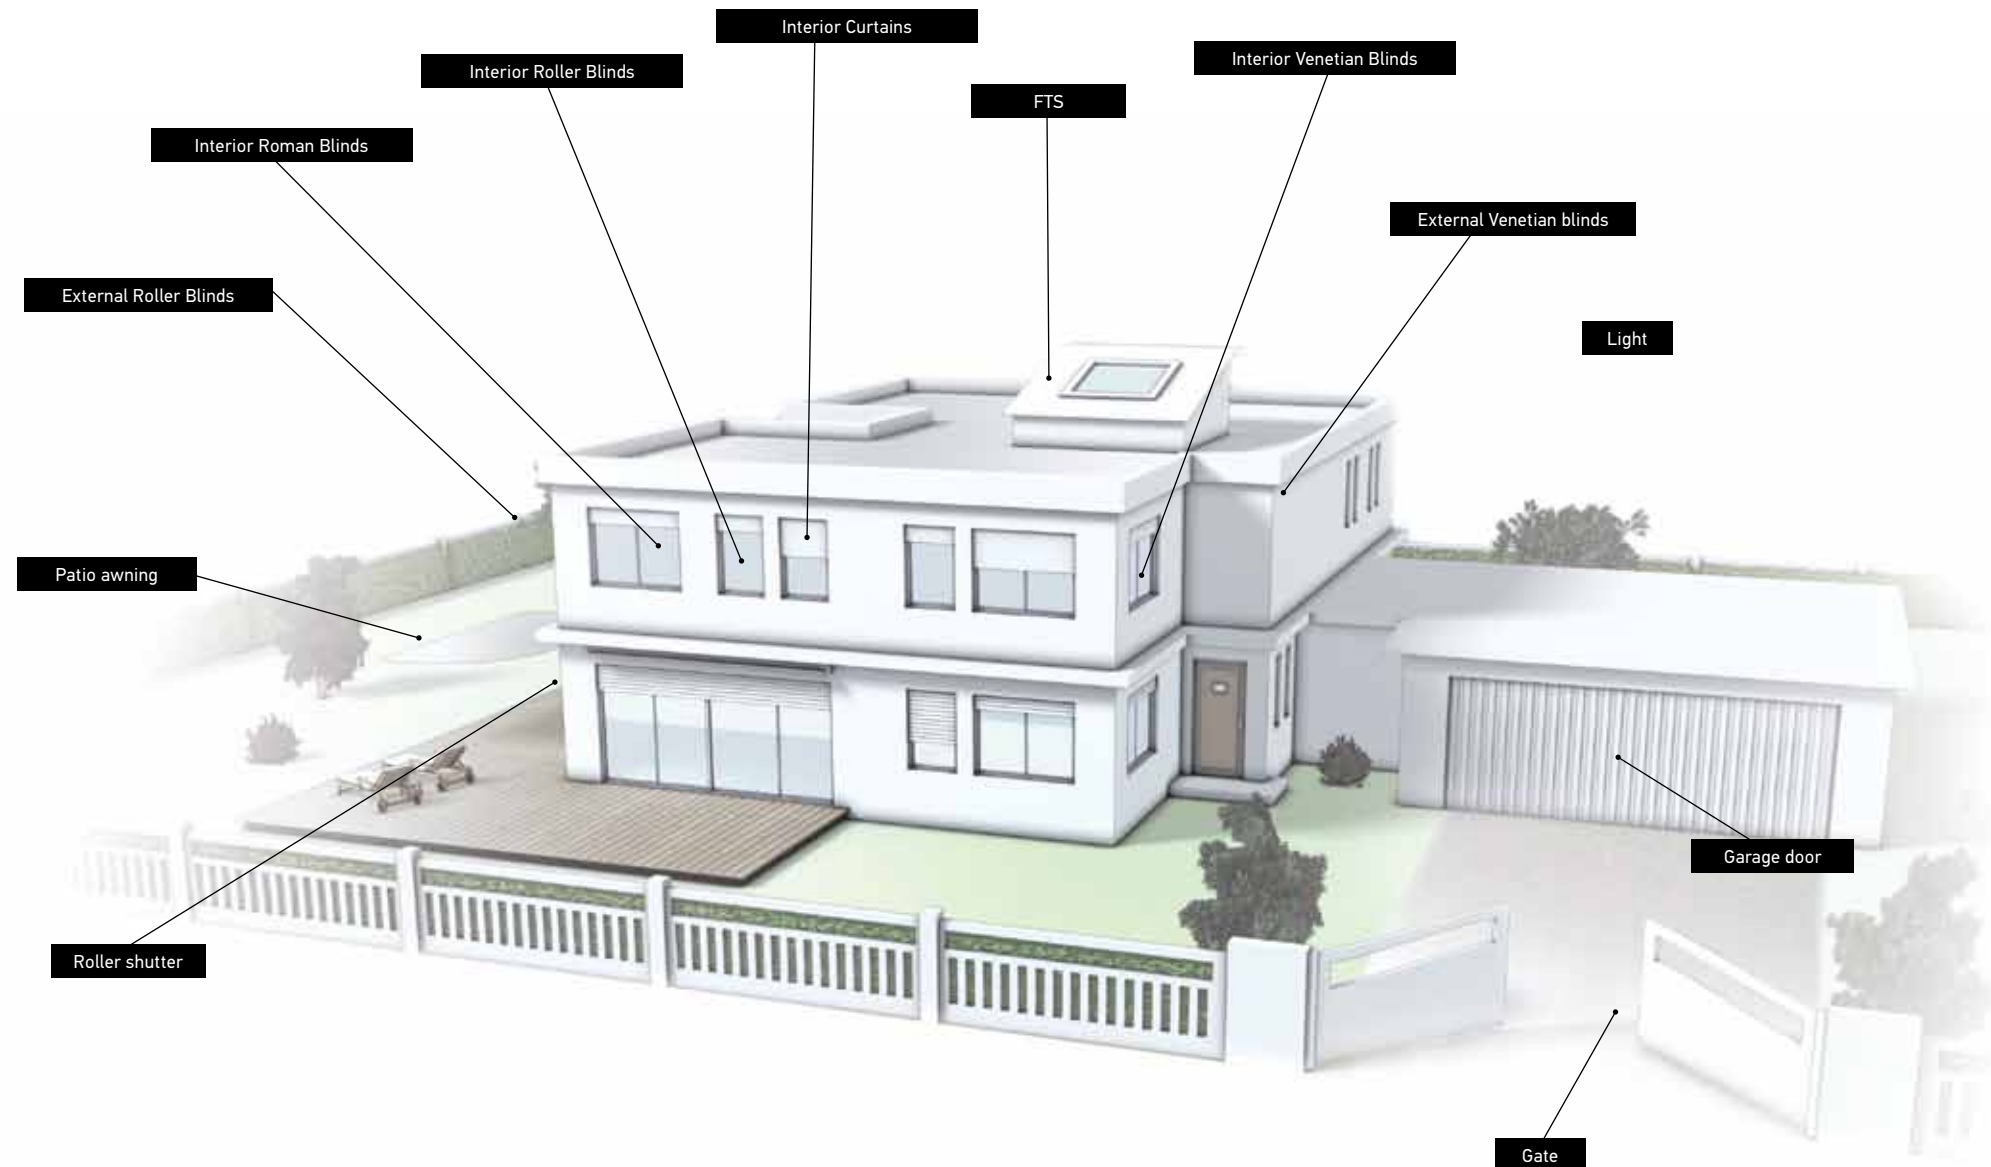

For these reasons, Somfy offers an unrivalled range of motors, control units and automatic systems for your window & blinds applications.

SOMFY MOTORISATION

Electric motors

Tubular motors for blinds' applications, Sleek rectangular motors for curtains' applications.

1. **Glydea™**: motorization solutions for curtains.
2. **Sonesse® 30**: near-quiet motorization for interior blinds.
3. **Sonesse® 40**: near-quiet motorization for large interior blinds.

Somfy Quality

CE Somfy motors are designed and tested to withstand thousands of use cycles, even in the most difficult weather conditions. Before being installed in your home, each and every Somfy product is tested on the production line.

5 year Warranty Somfy products come with a 5-year warranty.

RTS With over 10 million systems installed throughout the world, RTS is the industry standard for radio-controlled window covering solutions.

You can have all the benefits of motorised interior blinds and curtains

Do away with pull cords.

Just one push of a button is all

it takes to close your curtains or

adjust your blinds to maintain

your privacy.

Adjust your blinds effortlessly!

You will sometimes be nearer to a window than to your remote handset but here too, Somfy provides the perfect solution with Smoove wall-mounted control units. Being wireless, they can be mounted exactly where you want them without damaging your walls. A long-life battery is all that is needed to power them. Smoove lets you operate your blinds intuitively and fluidly.

Remotely control one blind or a group of blinds by room

Room control

• Smoove 1 RTS • Smoove 1 Open/Close RTS

- Wall-mounted, touch-sensitive single-channel control unit.
- For vertical opening and closing: interior blinds, projection screens.
- For horizontal opening and closing: curtains.
- Up, down, stop and "my" favourite position.

THE SOMFY ADVANTAGE

A wide choice of modules and frames to suit all décors.

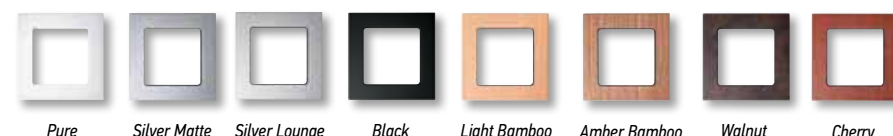

Three module finishes

Pure Shine Black Shine Silver Shine

Choice of eight frames

Pure Silver Matte Silver Lounge Black Light Bamboo Amber Bamboo Walnut Cherry

Remotely control your blinds or curtains from the comfort of your couch

The Somfy remote control range is tailored to your needs whether you have a single blind in one room or several throughout your home. The remote control enables you to open and close the curtains or adjust your blinds without getting up.

Remotely control one blind or a group of blinds by room

Room remote control

• Telis 1 RTS • Telis 4 RTS

- 1-channel or 4 + 1-channel remote control for centralised control.
- Functions: up, down, stop and "my" favourite position.
- 3 Finishes: Silver, Lounge and Pure.

THE SOMFY ADVANTAGE

The "my" button:

set a favourite position and recall it at the touch of a button (e.g. roller blinds halfway down). Simple to programme and to modify.

Got several blinds or curtains? Opt for the convenience of centralised control

By touching just one button on the remote control, you can position your blinds how you want them and create intimate spaces. The centralised control unit lets you control several window coverings at a time with a single press of a button – including the ones that are hard to reach. Handy!

Control all your blinds together or individually.

Home remote control

Telis 16 RTS

- Remote handset for controlling 16 pieces of equipment or groups of equipment.
- On-screen display for programming and viewing functions.
- Functions: > name the groups and identify them with icons.
> up, down and "my" favourite position.
- Low battery indicator.
- 2 finishes: Pure and Silver.

You can have all the benefits of motorised interior blinds and curtains

Accurately adjust the tilt
of your Venetian blind slats
with the remote control.
Discreet reliable automatic
devices will enhance your
comfort without damaging your
décor.

Adjust natural light with one touch of a button

Eliminate glare on your TV screen and
redirect bright sunlight by controlling
your motorised Venetian blinds with
one touch of a button.

Venetian remote control

• Telis 1 Modulis RTS • Telis 4 Modulis RTS

- 1-channel or 4 + 1-channel remote control for centralised control.
- Tilting of slats using central thumb-wheel.
- Functions: up, down, stop, modulation and "my" favourite position.
- 3 Finishes: Silver, Lounge and Pure.

EXCLUSIVE TO SOMFY

Adjust natural light levels simply and intuitively.

The scroll wheel on Telis Modulis remote control handsets allows you to direct your Venetian blind slats with precision. With just one finger and without getting up from the couch you can adjust the amount of natural light and make full use of your Venetian blinds.

Keep your home cool and protect your furnishings, even when you are out

Sun too bright? The sunlight sensor automatically closes sun protection devices without you having to lift a finger. This keeps your home cool and helps to maintain a pleasant temperature... saving you money on air-conditioning! Furniture, carpets and floor coverings are also protected from the sun's rays. Handy when you are away from home!

SOMFY RECOMMENDS

For enhanced comfort and protection, Somfy recommends the automatic "sun sensor" system.

• Automate a window's sun protection

WIRELESS INDOOR SUN SENSOR

Sunis Indoor WireFree™ RTS

- The blind is closed automatically once sunlight hits the window.

• Automate all the sun protection systems on the façade

WIRELESS SUN SENSOR

Sunis WireFree™ RTS

Façade sun sensor.

- 100% self-contained: wireless and no batteries (photovoltaic).
- Can be fitted anywhere on the façade of the house.
- Sensitivity can be adjusted according to the season.
- Only works with a Telis Soliris remote control unit.

BLINDS REMOTE CONTROL

• Telis Soliris RTS • Telis 4 Soliris RTS

Operate one blind or a group of blinds and manage the sun function of the RTS motor.

- 1-channel or 4 + 1-channel radio remote controls for centralised operation.
- Enable and disable the sun function of the RTS motor.
- Functions: up, down, stop and "my" favourite position.
- Pure, Silver and Lounge finishes.

You can have all the benefits of motorised interior blinds and curtains

People: Our number one priority

Quality, simplicity, privacy, thermal comfort, natural light quality and sustainable performance are the driving forces behind our products R&D processes. Somfy aims to offer an unrivalled selection of motors, accessories and automatic devices designed with well-being and the environment in mind.

Somfy, the world leader in motors and automatic controls

Somfy manufactures quality motors and control units for both residential homes and commercial buildings. Somfy has the complete range of automated solutions for all types of applications, including motorised curtains, roller blinds, roman blinds, venetian blinds, external venetian blinds, gates, awnings, projection screens and TV lifts.

Somfy also engineer sun-protection systems (weather sensors and controllers) allowing you to have a control over the amount of sun emission and shade within your home and working environment. Thereby increasing your home / building's energy efficiency.

Reliability and Quality have been Somfy's bywords for over forty years. The attainment of ISO 9001 certification in 1995 attests to Somfy's continual commitment to its 40 years of quality excellence heritage. To date, Somfy products have obtained over 600 approvals worldwide.

All products are designed for a service life of over 10 years and are provided with a 5-year warranty.

Founded in France in 1969, Somfy was established at the foot of Mont Blanc, a region known for its precision instruments technologies. With 8 production sites, Somfy has an industrial capability to be efficient and responsive. Its requirement of quality satisfies the needs of 270 million users, and 32,000 professionals worldwide.

Today, Somfy has an extensive and rapidly growing distribution network across 56 countries, and over 70 subsidiaries.

THANKS 100 MILLION!

100 million motors produced worldwide

Somfy has recently produced its 100 millionth motor. This accomplishment reinforces Somfy as the largest manufacturer of interior and exterior window covering motors in the world. Each Somfy motor purchased comes with a five year warranty, ensuring consumers top quality and service for their products.
