CONNEXOON

1 UNIT, 3 ENVIRONMENTS, 3 APPLICATIONS

CONNEXOON WINDOW

CONNEXOON TERRACE

CONNEXOON ACCESS

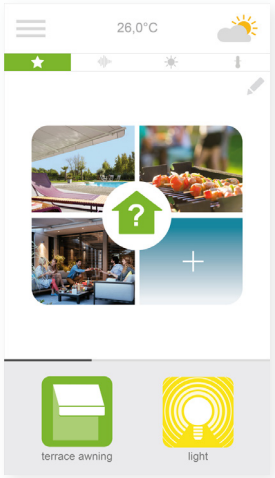

CONNEXOON homecontrol

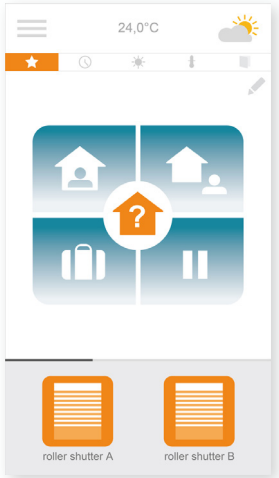

SWITCH TO CONNECTED MODE

CONNEXOON TERRACE

CONNEXOON WINDOW

CONNEXOON ACCESS

3 apps to switch the device in your home to connected mode

A choice of 3 apps to control **3 home environments from a smartphone**: window shutters and blinds - the terrace - entrances

The benefits of being connected to your house and your devices, whether you are personally present or away from home.

Unique, intuitive, convenient functions that everyone can use and that bring the peace-of-mind and well-being that make home living even more enjoyable.

CONNEXOON
ALWAYS IN CONTROL

Always in control!

To programme your home living scenarios, leave home in complete peace of mind or check the status of your home's doors and windows (windows, shutters, blinds), wherever you are.

Main functions:

Click & Go!

Trigger the closing of your roller shutters, activate an alarm with a single press ... so you can leave home with complete peace-of-mind, quickly and easily.

Cocoon

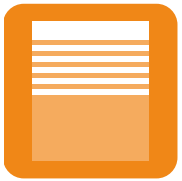

Programme opening/closing scenarios for the roller shutters or Exterior Venetian Blinds associated with weather sensors, a timer or an alarm. Child's play for a securely protected house.

Check Window

Checking whether your windows and roller shutters are properly closed when you leave the house or are away from home is so simple. Just press! Stay in control!

CONNEXOON

Connexoon Window is compatible with:

Roller Shutters io

Exterior Vertical Blind io

Exterior Venetian Blind io

Skylight io Velux io

Roof Window Roller Shutter io Velux io

Alarm io

Lights io

Philips Hue Lighting

Sun Sensor io

Temperature Sensor io

NEW Opening Detector io

A. QUICKLY STORE THE io-homecontrol PRODUCTS in the Connexoon unit (prog-prog)

If the devices you want to connect are paired with a remote control without feedback function (Smoove, Keygo, Situo):

The simplified procedure below makes it possible to perform pairing without an internet connection and without activating the account.

1. Connect Connexoon to the power supply.
2. Press the Prog button on the control point for 2 secs.
3. Then press briefly for 0.5 sec. on the Connexoon unit.
4. After pairing your devices, press for 8 seconds on Connexoon. Your devices will then move up and down a short distance. This confirms that your products are paired.

If the installation contains a control with feedback function, see page 45 (function intended for installers only).

C. DOWNLOAD THE CONNEXOON WINDOW APPLICATION

CONNEXOON WINDOW

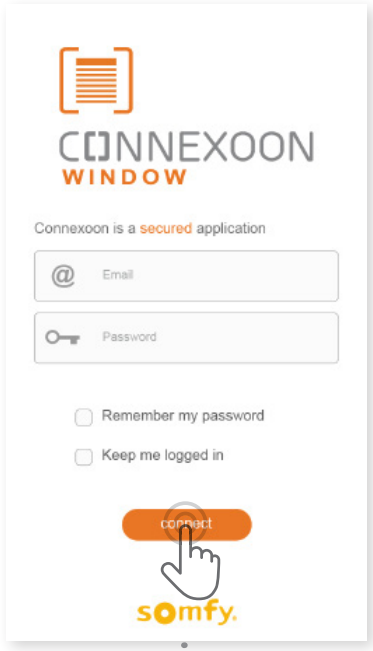

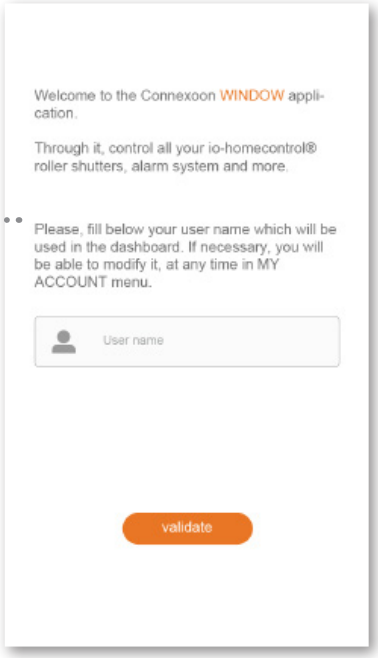

Download on the App Store

ANDROID APP ON Google play

Download the Connexoon Window
smartphone application that is available for **IOS** and **Android**.

C. DOWNLOAD THE CONNEXOON WINDOW APPLICATION

[A] Enter the email address and password that you defined when activating your Connexoon unit.
(see page 13, Activation screen)

[B] Define your user name.
Via the user name, you can find out what actions have been performed from your smartphone.

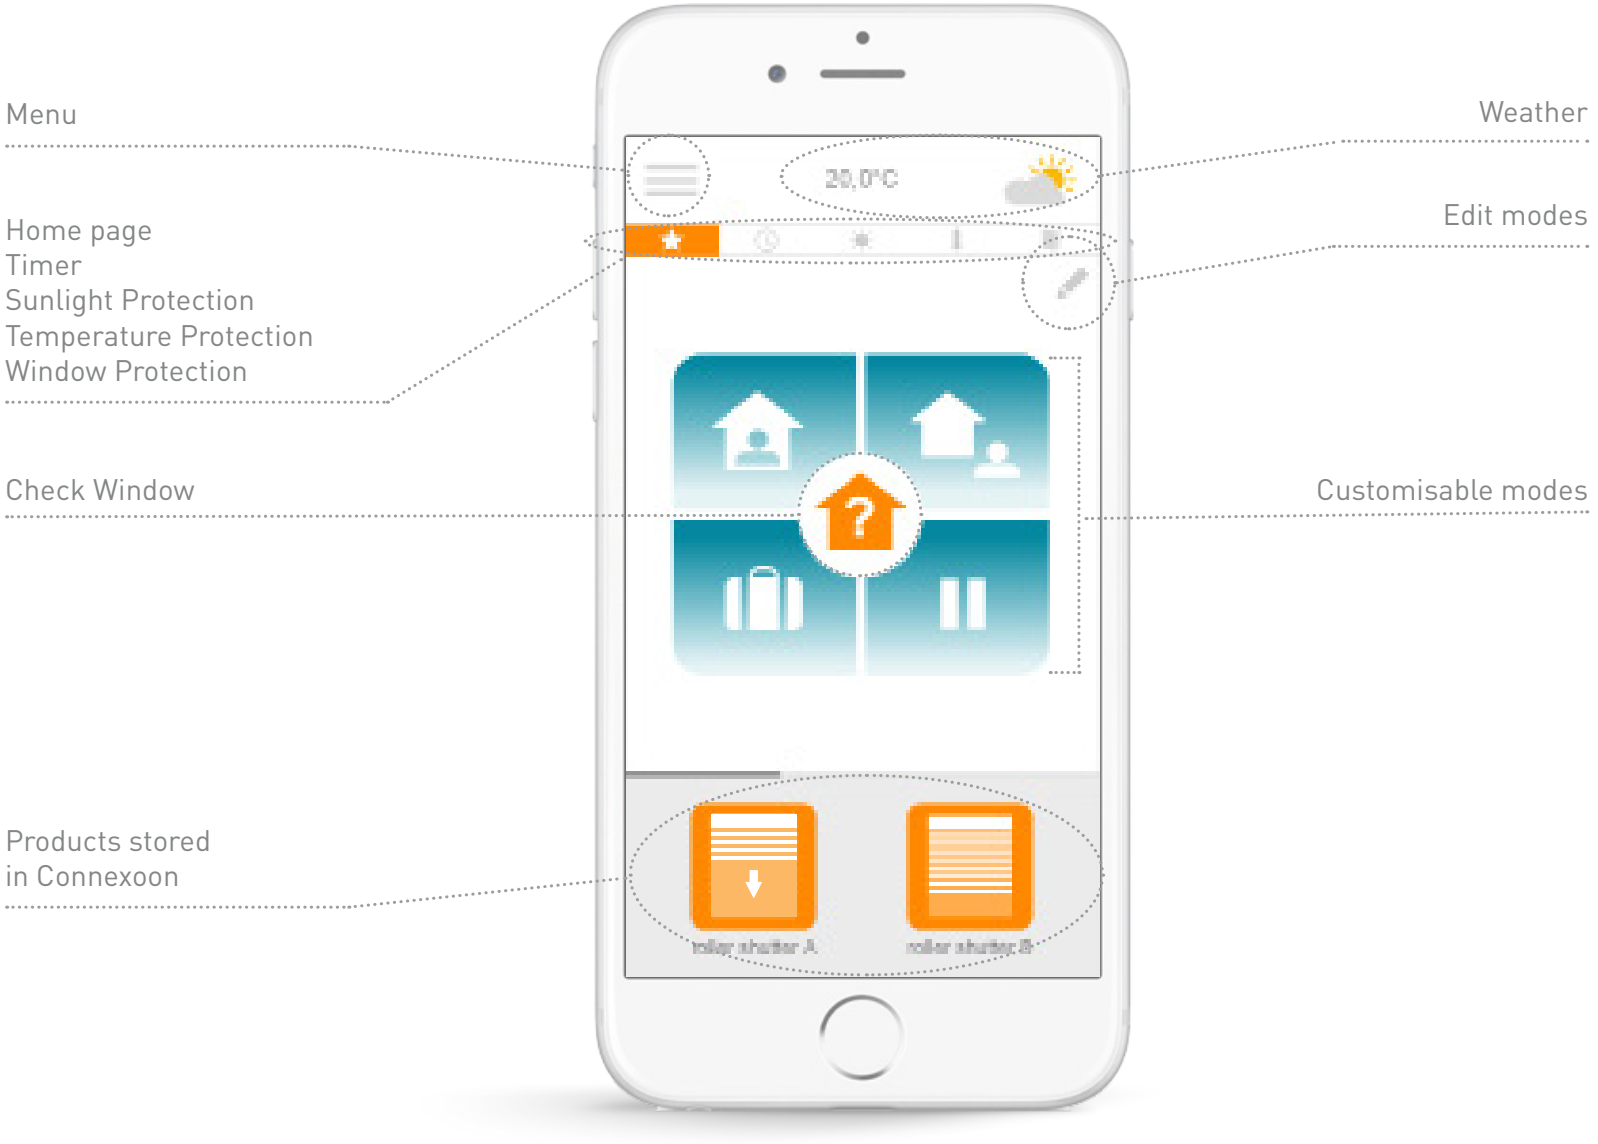

You can change your user name at any time in the "Parameters" tab in the menu ☰ that you will find in the history.
(see page 40, Menu)

< Back to Contents

3 USING CONNEXOON WINDOW

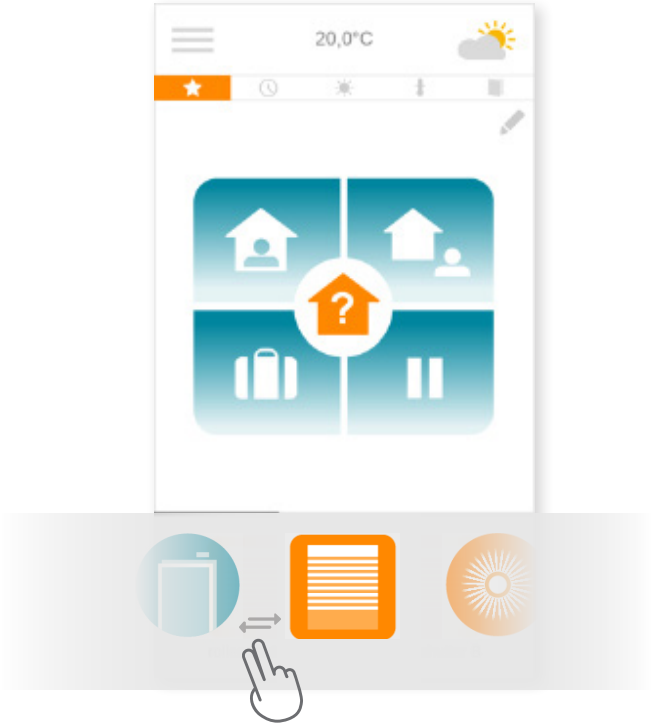

< Back to Contents

A. THE INTERFACE

< Back to Contents

B. CONTROLLING MY PRODUCTS

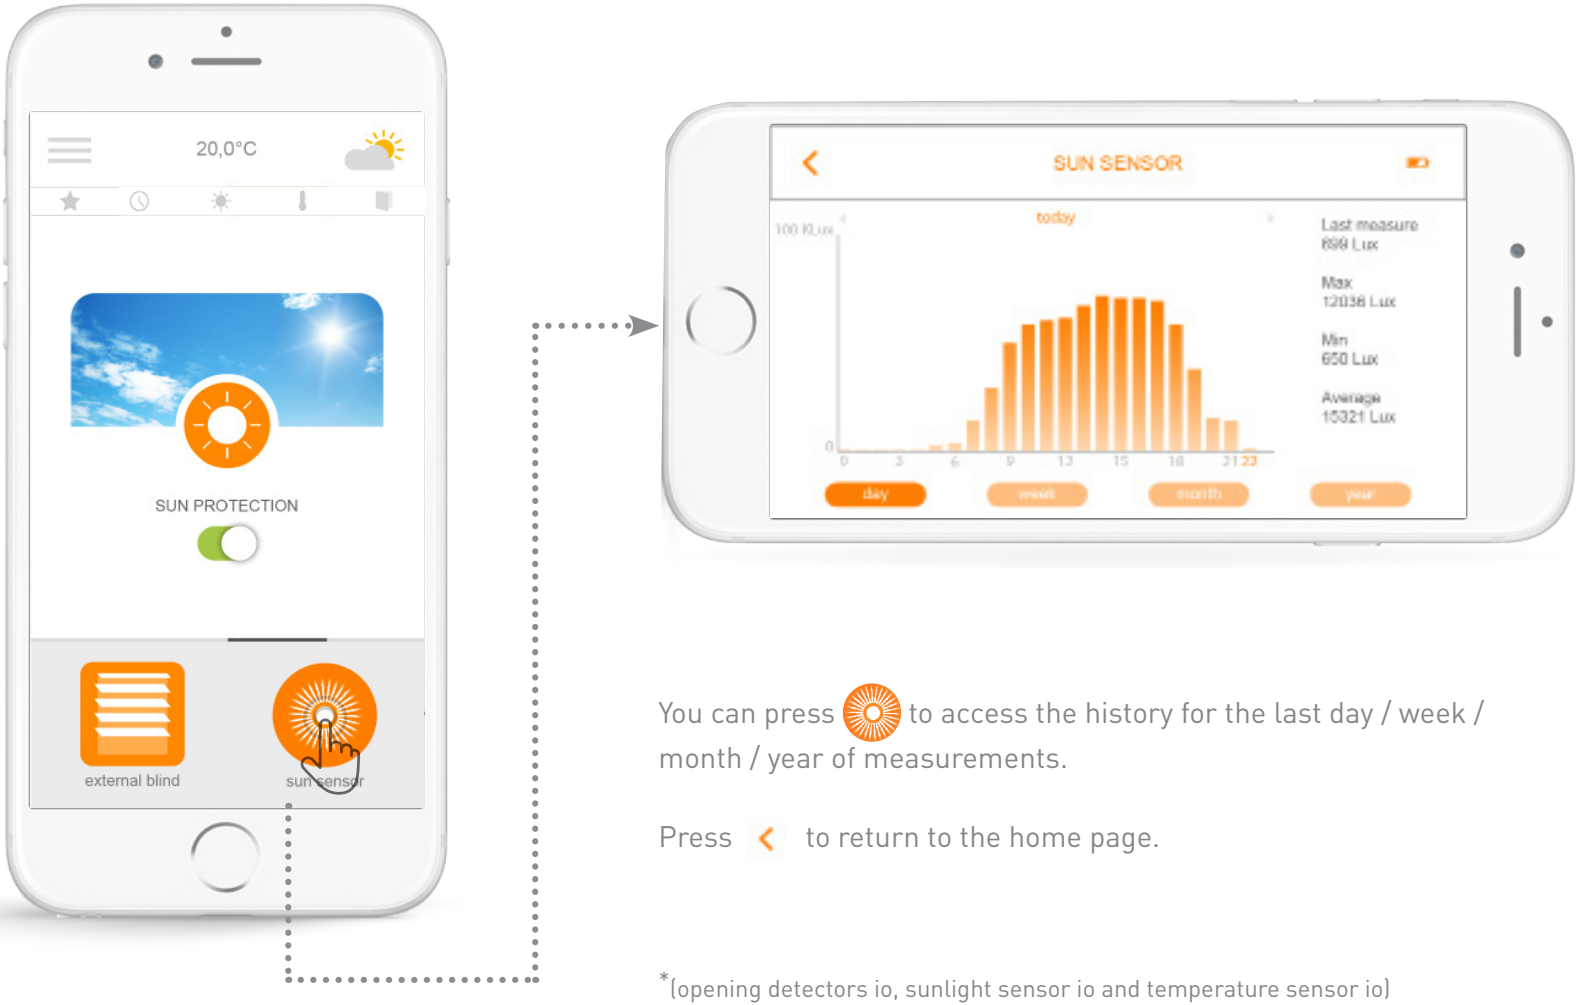

[A] You can control your roller shutters, exterior Venetian blinds, lighting etc. in the grey box at the bottom of the interface.

Press the icon corresponding to the product you want to control by dragging the list to the right or left *(for example: roller shutter)*.

[B] Adjust its position using the arrow and then press OK.

< Back to Contents

B. CONTROLLING MY SENSORS*

You can press to access the history for the last day / week / month / year of measurements.

Press to return to the home page.

*(opening detectors io, sunlight sensor io and temperature sensor io)

< Back to Contents

C. MAKING LIFE EASY: THE MODES

Connexoon Window provides you with 4 modes “I’m at home – I’m leaving – I’m on holiday – Do not disturb”.

You can customise each of these modes by choosing the actions you want to perform (open or close your roller shutters, switch your lights on or off, activate your alarm) and by activating or deactivating your programmes or your alerts.

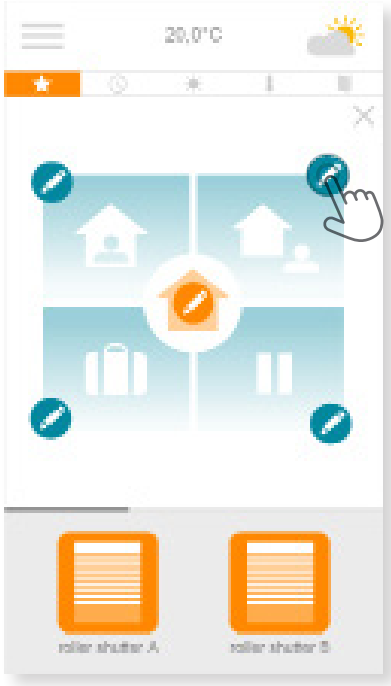

You can then find your modes again with a single press!....

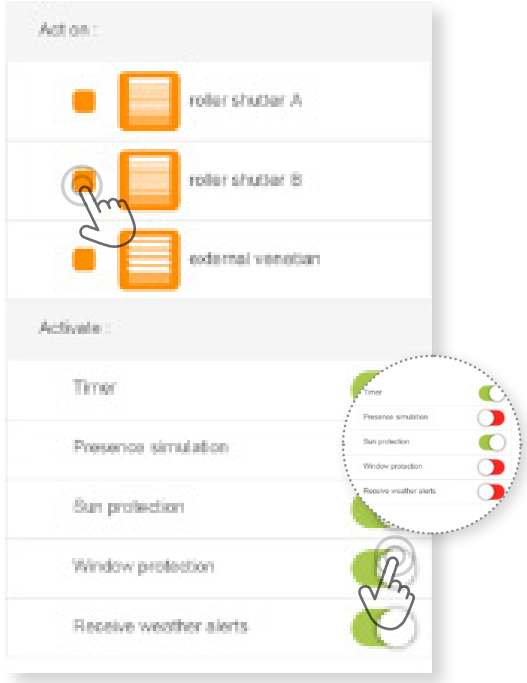

For example: you are leaving on holiday. Press once to shut your ground floor roller shutters, activate the alarm, switch off the lights and activate simulated presence.

< Back to Contents

C. MAKING LIFE EASY: THE MODES

[A] Press to programme a mode.

[B] Select the mode that you want to customise from the following options:

"I'm at home – I'm leaving – I'm on holiday – Do not disturb"

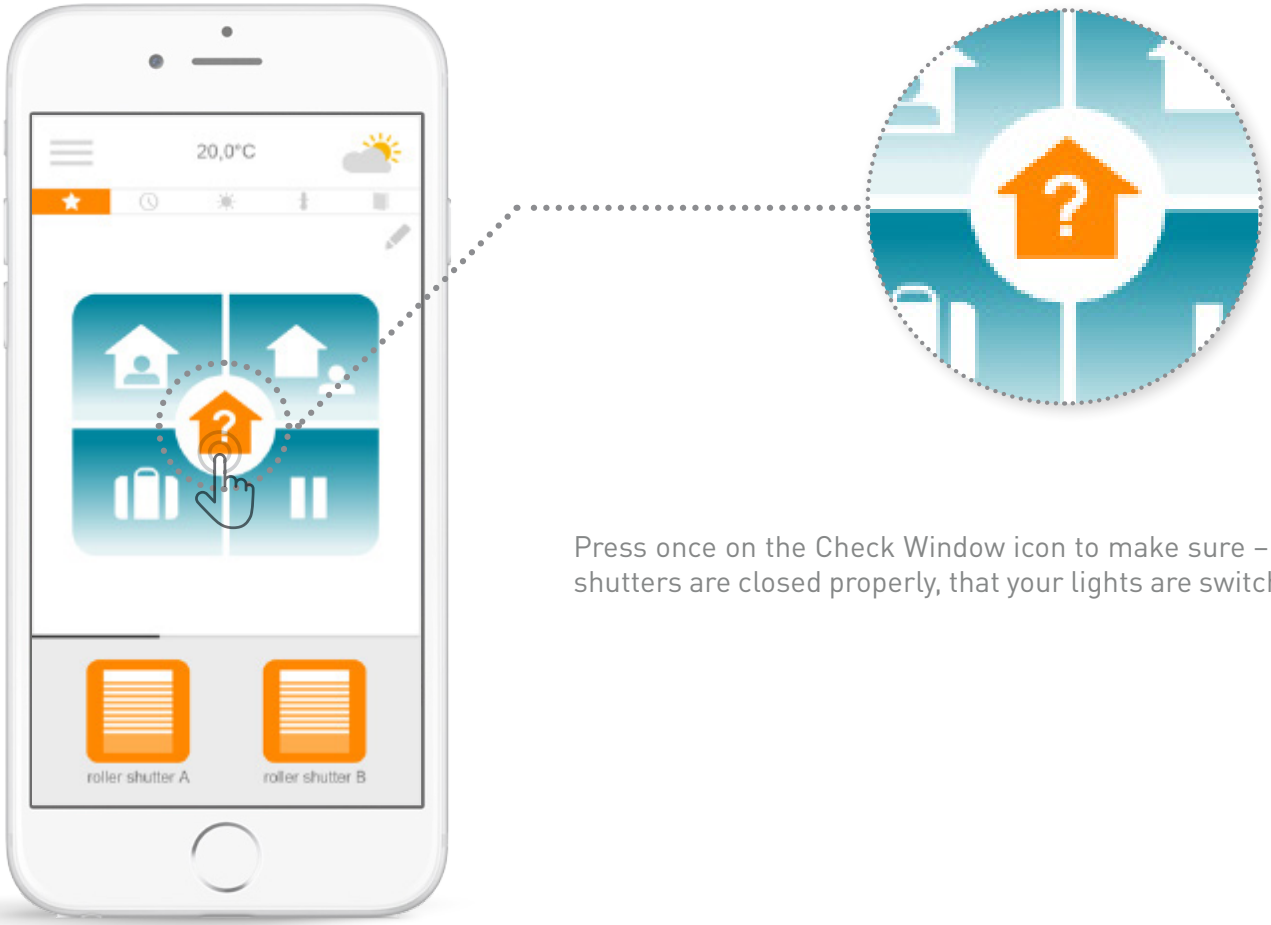

[C] For each mode:

- Select the devices that you want to control.
- Activate or deactivate the timer, simulated presence, the sunlight / temperature / window protections.

* These programming operations are only available if you have connected a sunlight /temperature / opening sensor

< Back to Contents

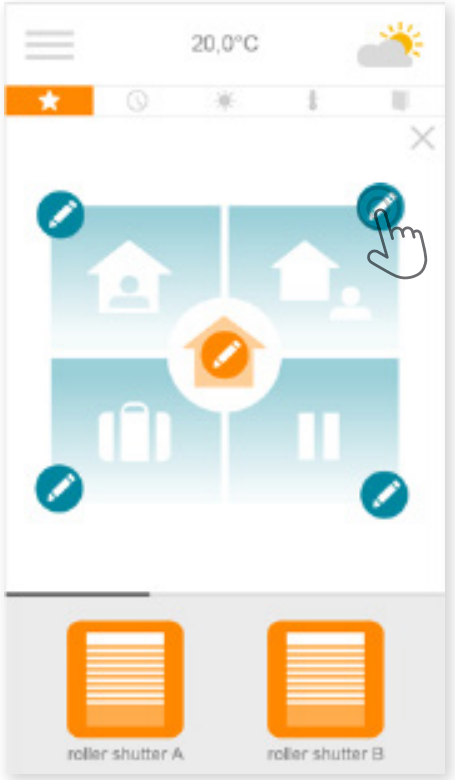

D. CHECK WINDOW

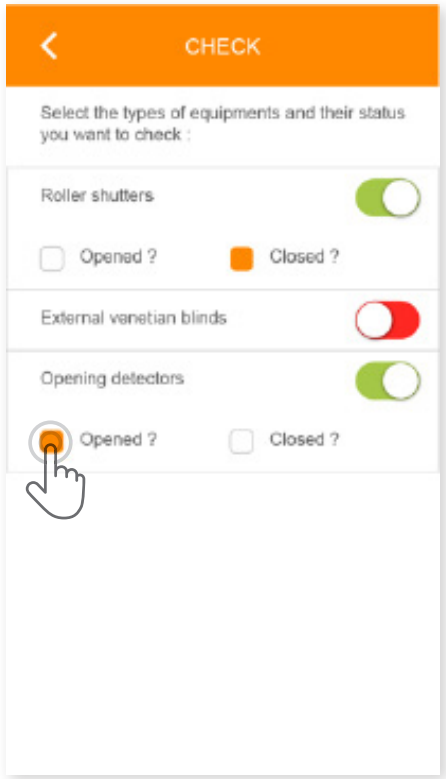

Press once on the Check Window icon to make sure – wherever you are – that your roller shutters are closed properly, that your lights are switched off, that your alarm is activated.

< Back to Contents

D. CHECK WINDOW

[A] Press the button.

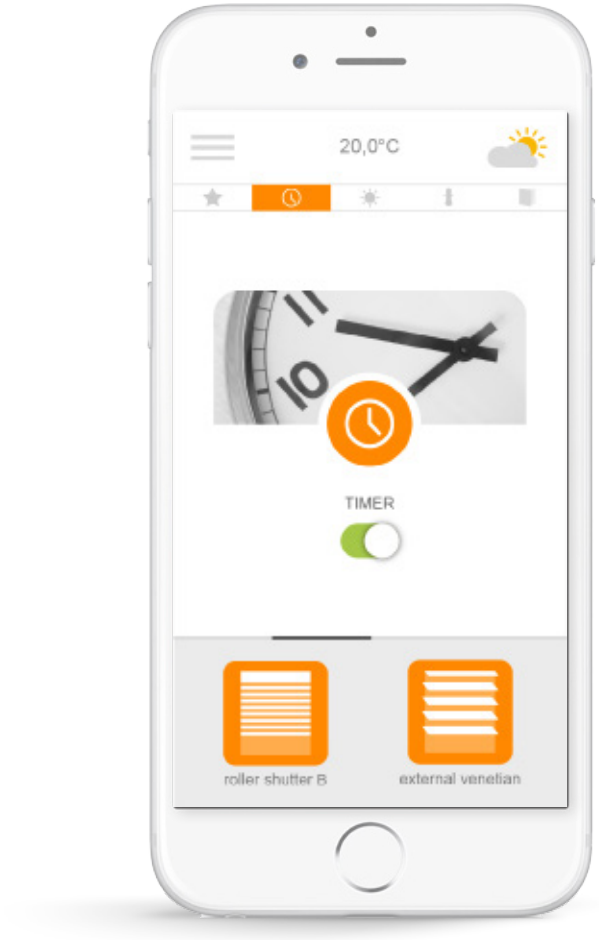

[B] Press in the centre of the interface.

[C] Select the questions that you want Connexoon to answer when you press Check Window.

For example, when I go away I keep wondering whether I switched off all the lights or whether I closed the ground floor shutters.

< Back to Contents

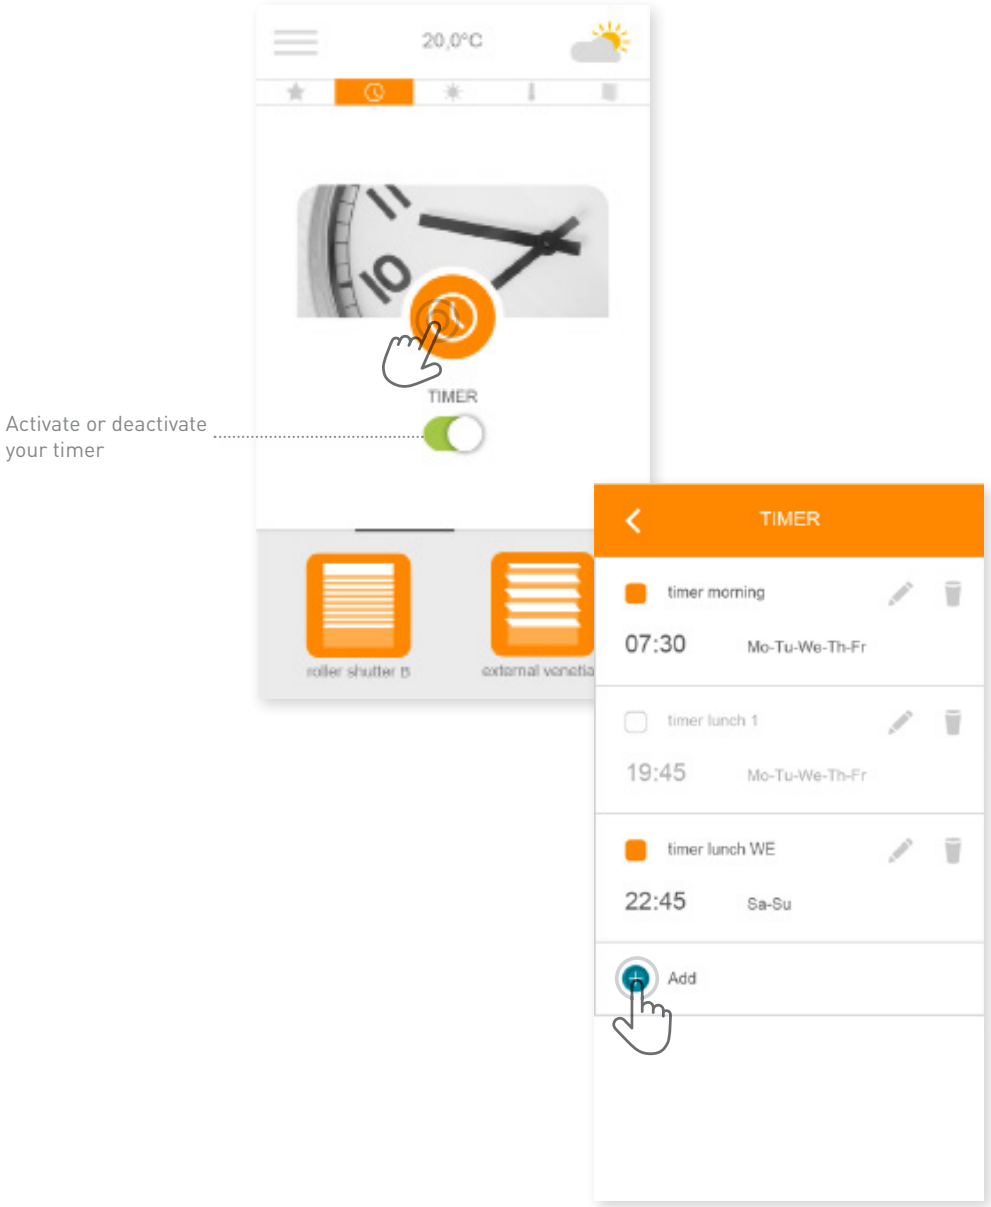

E. MY TIMER

Press the icon to access the timer menu. The timer is used to programme your devices depending on the time of day.

< Back to Contents

E. MY TIMER

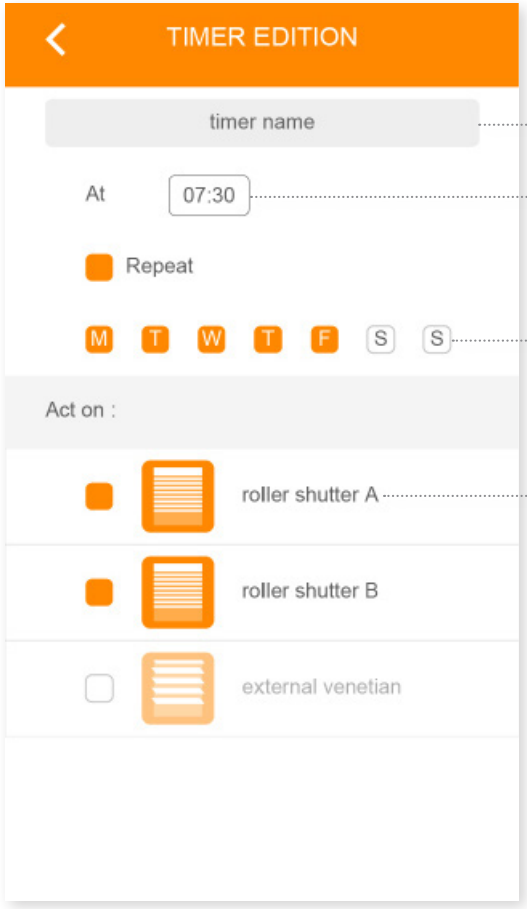

[A] Press to access the "Timer" menu and then press to make the settings for this function.

[B] To programme another timed function, press .

< Back to Contents

E. MY TIMER

[C] Name the “timed function” you have programmed *(e.g.: morning, wake-up, sun, evening, bed time, etc.).*

[D] Define the programmed time.

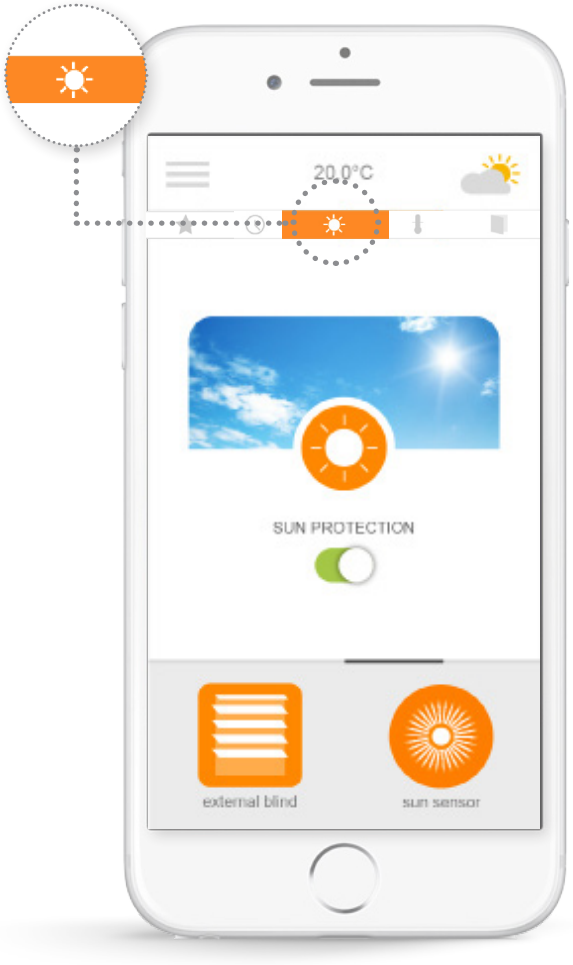

[E] Select the days on which you want your timer to become active.

[F] Select the devices you want to control.

< Back to Contents

F. MANAGING SUNLIGHT INTENSITY

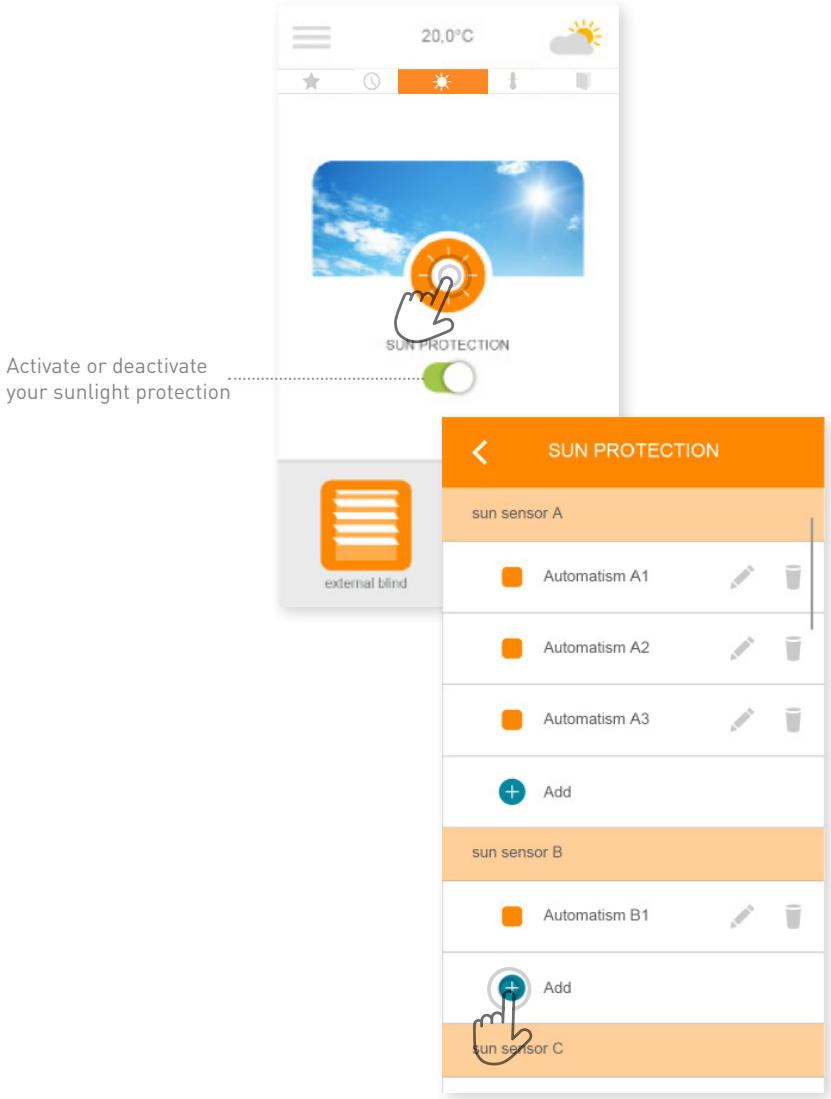

Sunlight protection* allows you to control your roller shutters, exterior Venetian blinds, etc. depending on the intensity of the sunlight. For example, this allows you to keep your home cool in the summer by lowering your window shutters or blinds automatically.

*only if you possess a Sunis wirefree io sunlight sensor

< Back to Contents

F. MANAGING SUNLIGHT INTENSITY

[A] Press the icon.

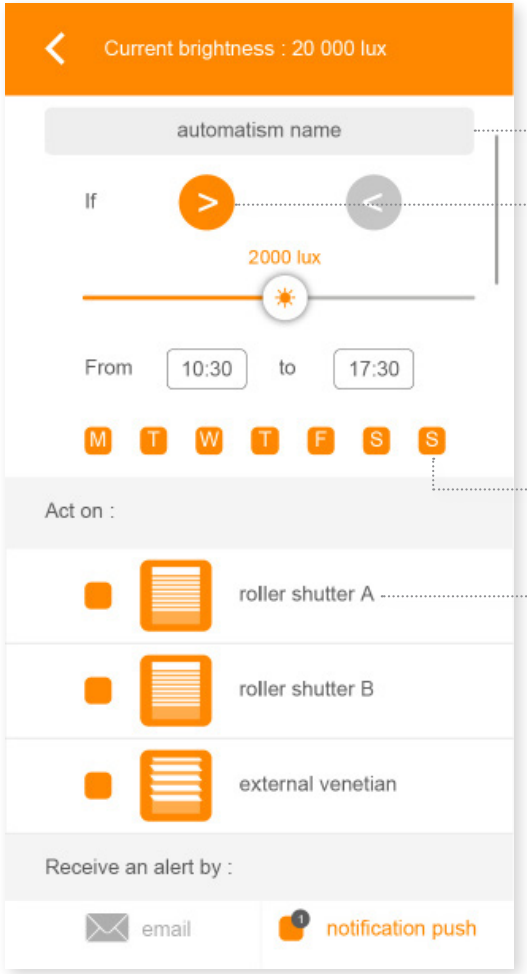

[B] Press the button to create a new sunlight condition.

A programme for each level of sunlight intensity,
4 programmes possible per sensor.

Building happiness

< Back to Contents

F. MANAGING SUNLIGHT INTENSITY

[C] Give a name to your "sunlight protection".
e.g. Winter sun, summer sun, etc.

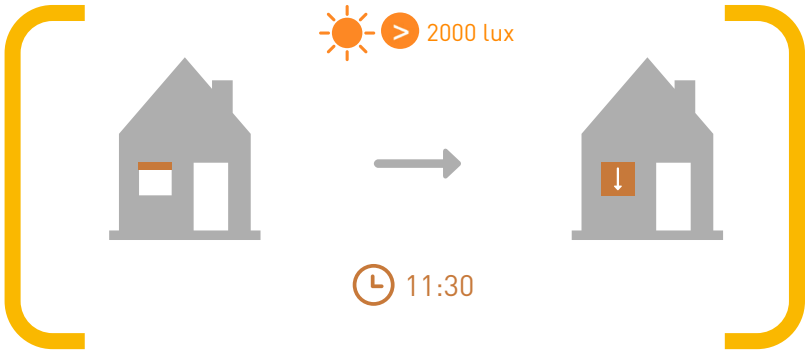

[D] Define the brightness level by selecting one of the two conditions:

> "greater than" or < "less than", followed by the triggering threshold, which you set by dragging the cursor.
To help you define this threshold, the currently measured brightness is displayed at the very top of the page.

[E] Define the time range and then the days on which you want this condition to apply.

[F] Select the devices you want to control. Then choose whether or not you want to receive an email alert and/or push notifications when the programme is triggered*.

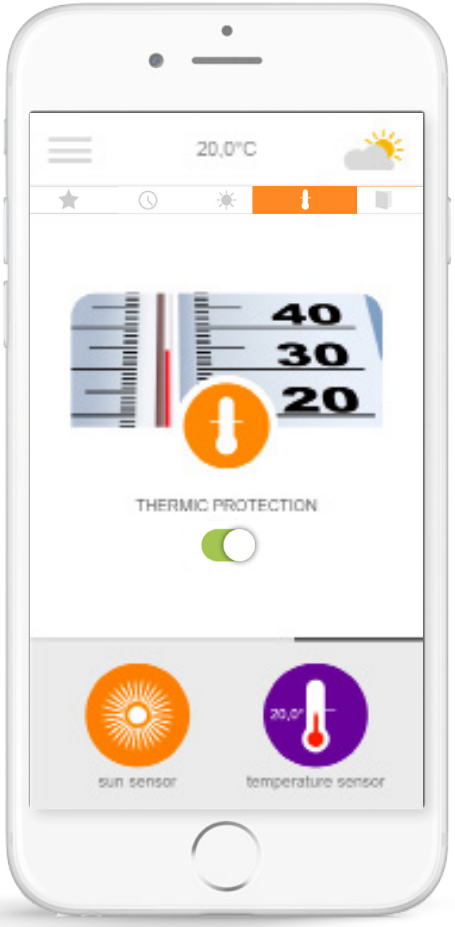

* First activate email notifications and/or push notifications in the menu (see page 42)

Building happiness

< Back to Contents

G. MANAGING THE TEMPERATURE*

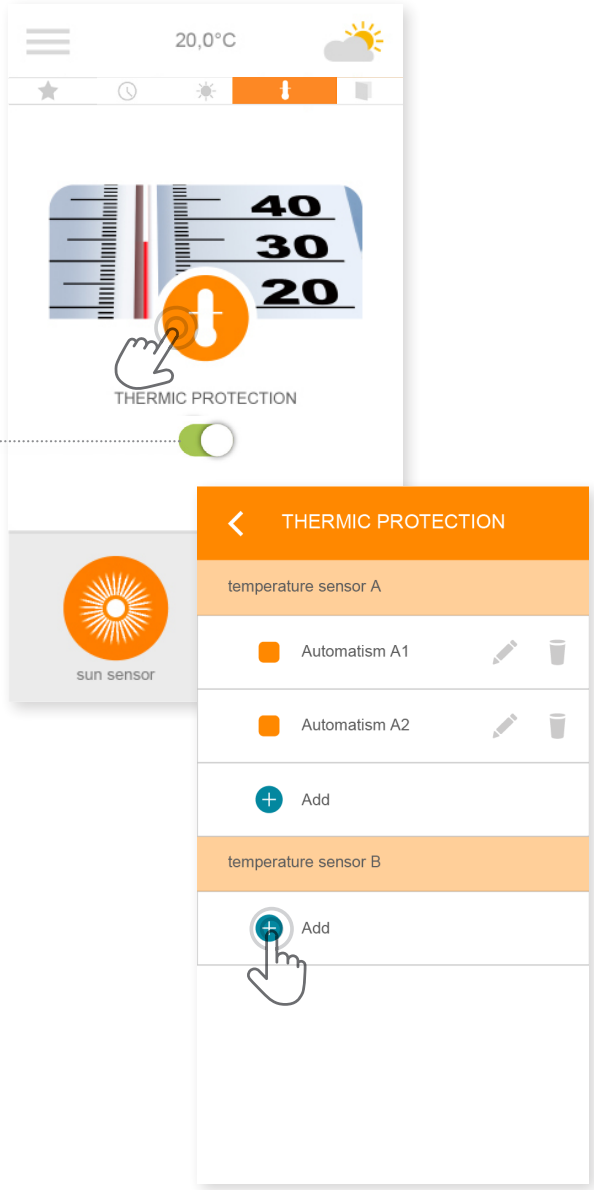

Temperature protection* allows you to control your roller shutters, exterior Venetian blinds, etc. depending on the indoor or outdoor temperature. This allows you, for example, to insulate your home better in the summer by closing the roller shutters as soon as the outdoor temperature becomes too high while you are away.

* only if you possess a Thermis wirefree io temperature sensor

< Back to Contents

G. MANAGING THE TEMPERATURE*

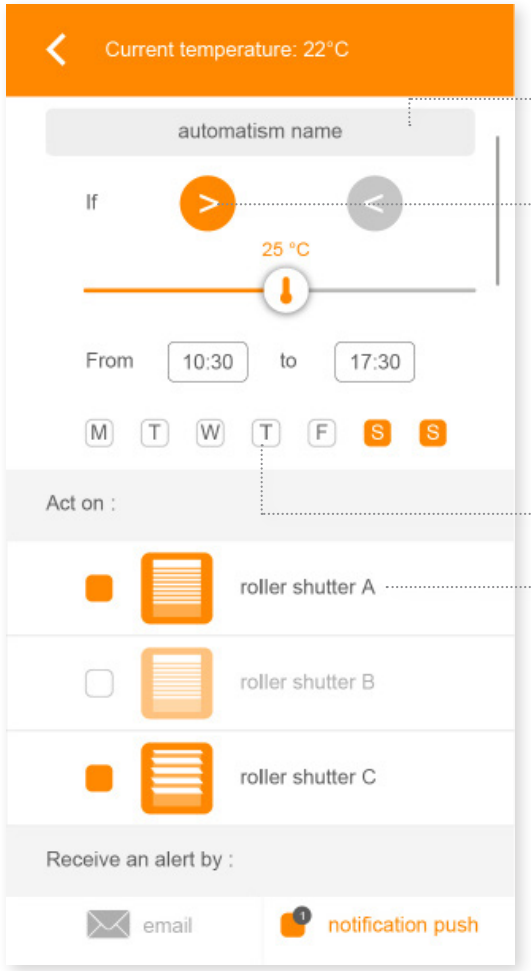

[A] Press the icon.

[B] Press the button to create a new temperature condition.

Building happiness

< Back to Contents

G. MANAGING THE TEMPERATURE*

[C] Give a name to your "temperature protection".

[D] Define the temperature threshold by selecting one of the two conditions:

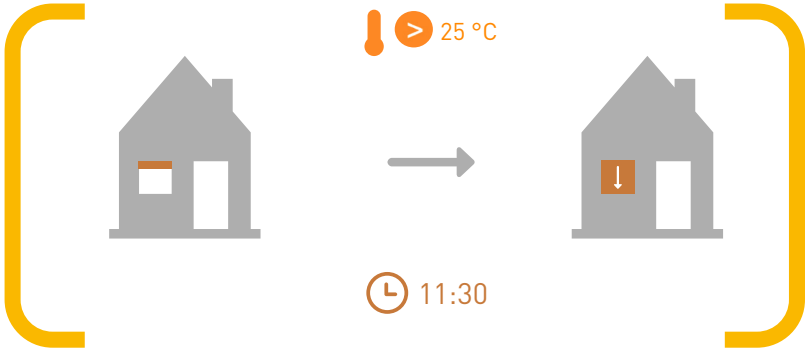

> "greater than" or < "less than", followed by the trigger value, which you set by dragging the cursor.

To help you define this threshold, the current temperature is displayed at the very top of the page.

[E] Define the time range and then the days on which you want this condition to apply.

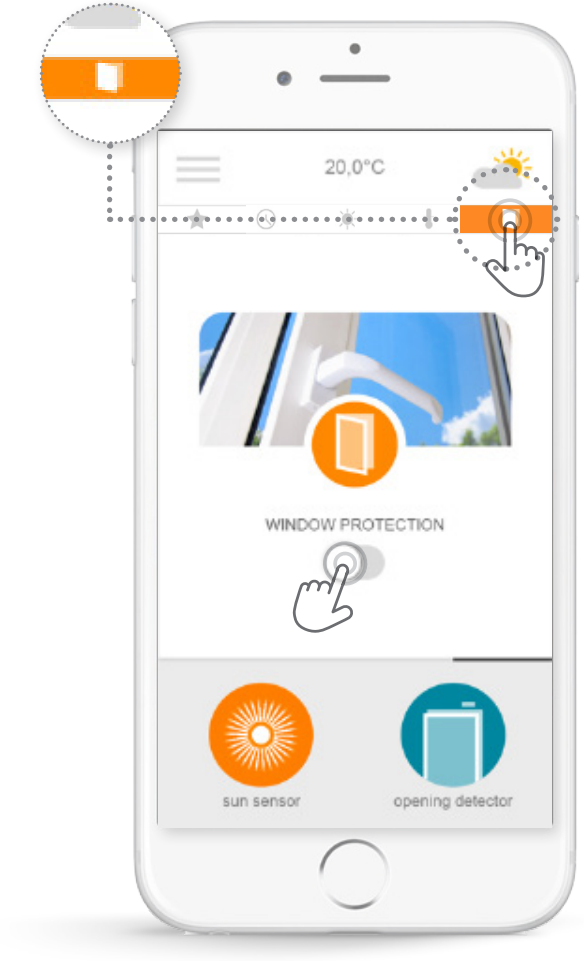

[F] Define the devices you want to control.
Then choose whether or not you want to receive an email alert and/or push notifications when the programme is triggered*.

* First activate email notifications and/or push notifications in the menu (see page 42)

< Back to Contents

H. PROTECTING MY WINDOWS

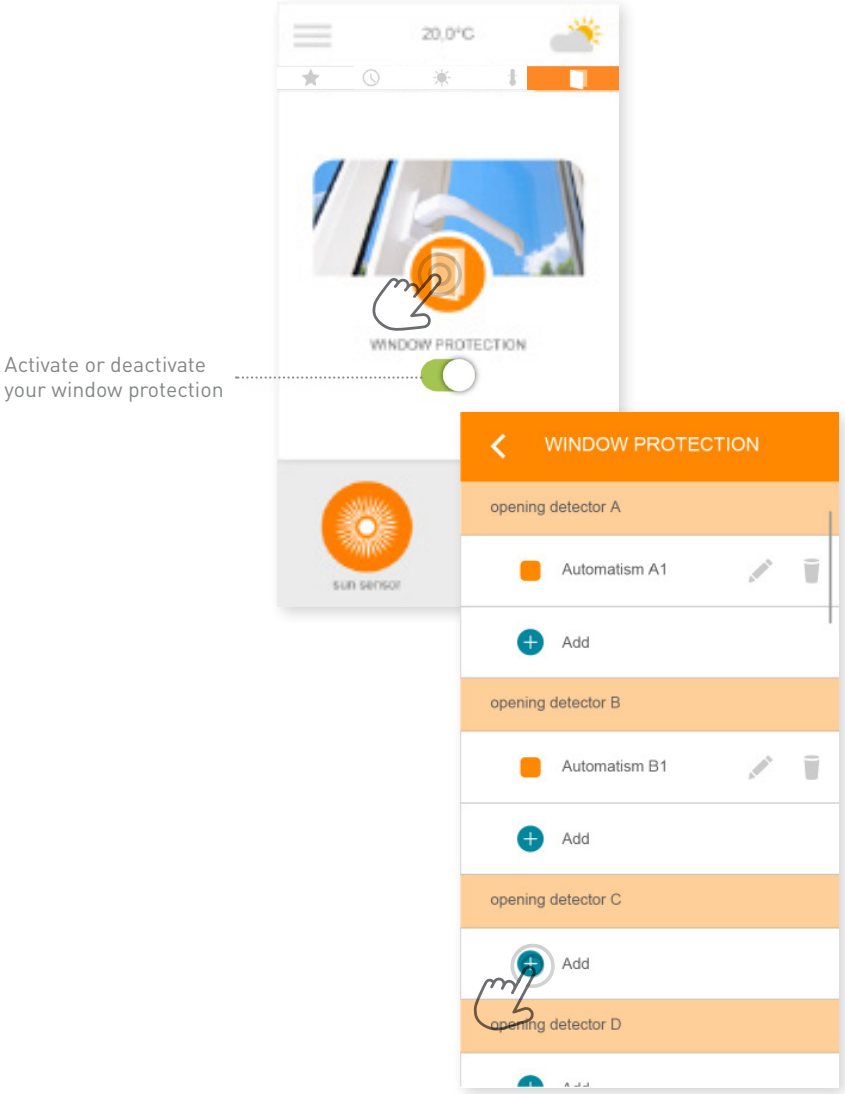

Window protection* allows you to make sure that your windows are properly closed when you are away from home. If you have forgotten to do so, you can automatically close a window's roller shutter for greater security. Window protection allows you to trigger your devices automatically depending on the position of your window (open or closed).

*only if you possess an io opening detector (1 detector per window).

< Back to Contents

H. PROTECTING MY WINDOWS

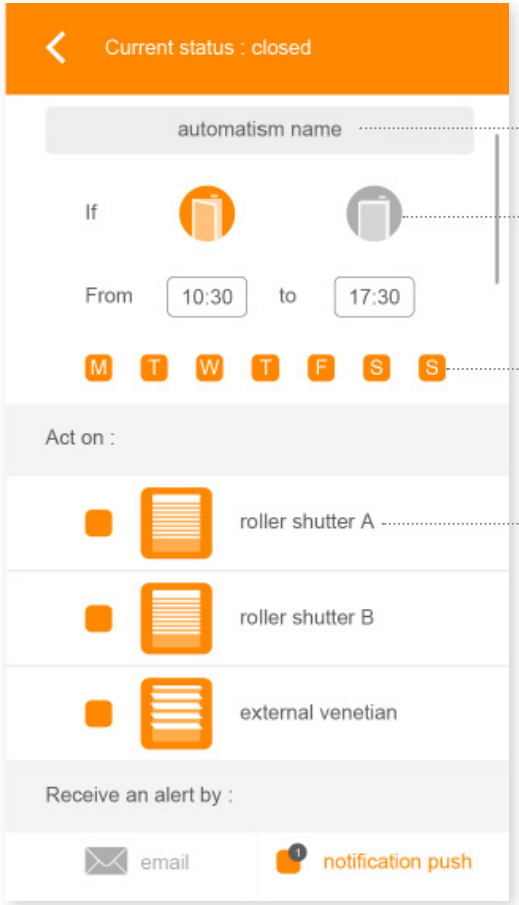

[A] Press the round button.

[B] Press the button to create a new window protection condition.

< Back to Contents

H. PROTECTING MY WINDOWS

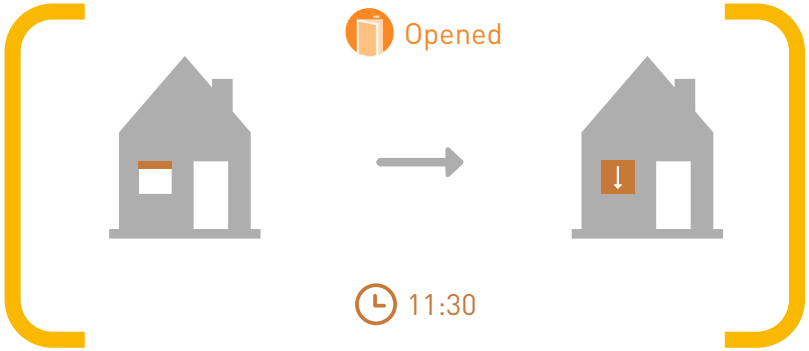

[C] Give a name to your window protection.

[D] Define the condition or .

[E] Define the time range and the days on which you want this condition to apply.

[F] Define the devices you want to control.
Then choose whether you want to receive an email alert and/or push notifications when the programme is triggered*.

* First activate email notifications and/or push notifications in the menu (see page 42)

4 MANAGING MY INSTALLATION

< Back to Contents

MANAGING MY INSTALLATION

You press ☰ to access a range of functions that allow you to configure and manage your Connexoon Window application:

- the dashboard,
- your messaging system,
- the parameters,
- your account,
- the help system,
- disconnecting from your application.

The “Configuration” menu provides access to the advanced installation functions. This menu is intended only for installers (see section 5).

< Back to Contents

A. DASHBOARD

Just press on this menu to open a history of all your connected devices.

- **A green dot** in front of a command indicates that the action was completed correctly.
- **A red dot** indicates that the action was interrupted deliberately.
- **An orange triangle** indicates that a problem occurred.

Press the ⊕ icon for more information.

< Back to Contents

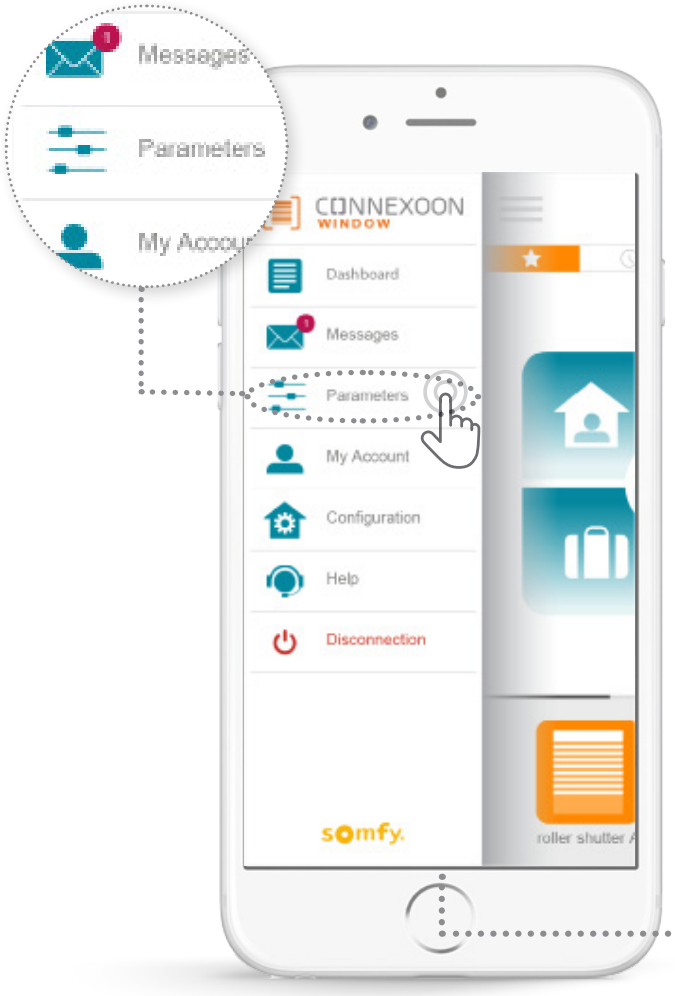

B. MESSAGES

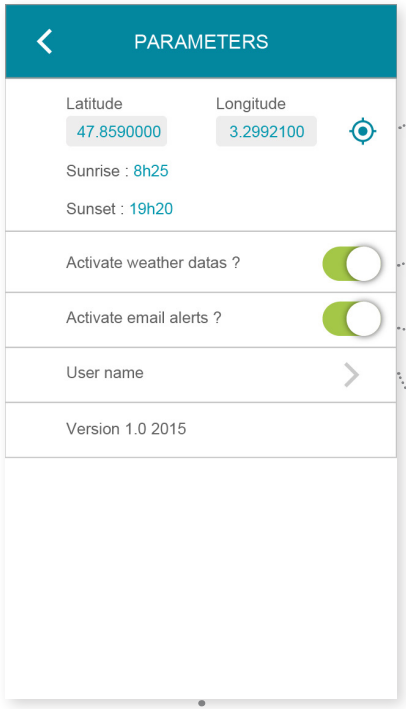

You will find all the information you need about updates and planned new features in your messaging system ("Messages" menu).

< Back to Contents

C. PARAMETERS

Specify the geolocation of your home in order to receive local weather information.

Activate / deactivate the weather display on the home page.

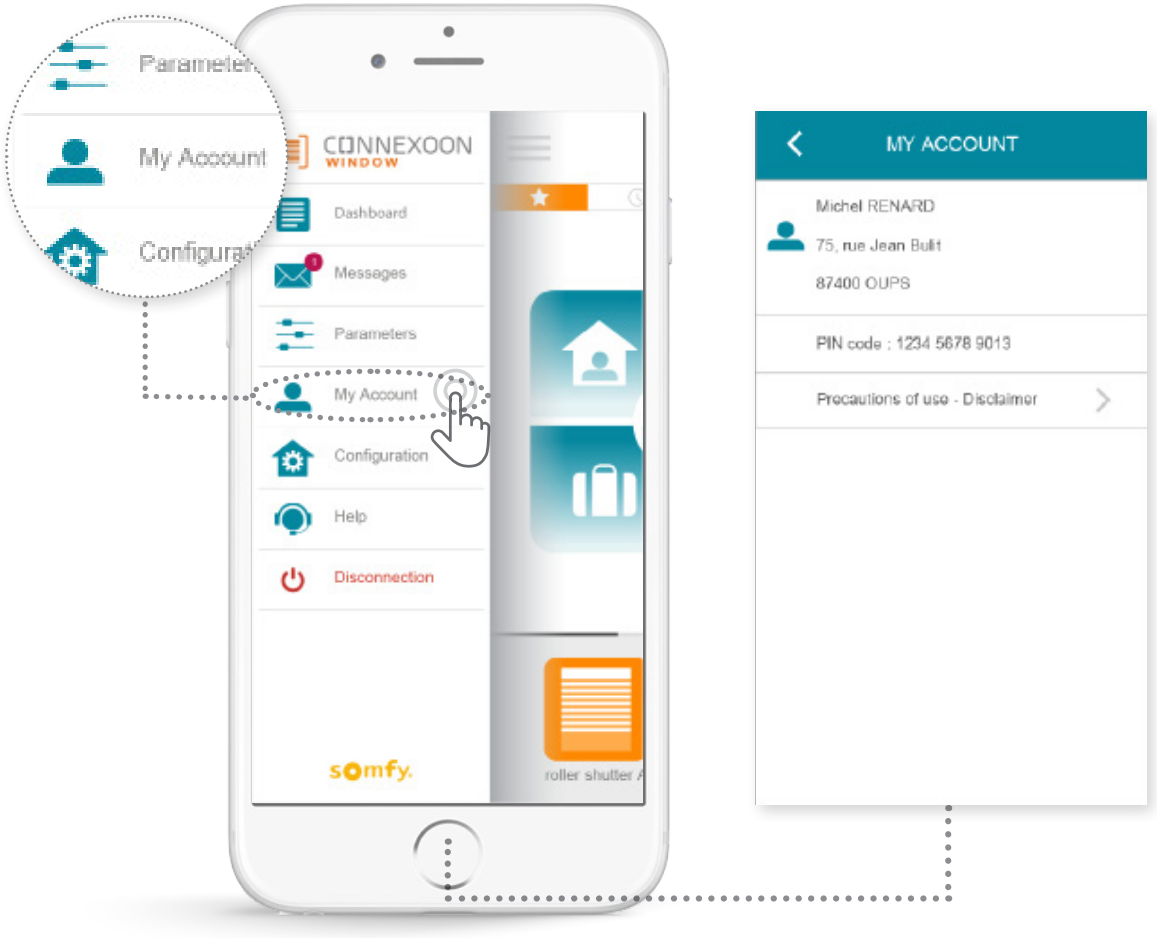

Activate / deactivate email alerts.

Change your user name.

This menu allows you to activate the display of weather data and activate alerts and/or push notifications. It also allows you to display the widgets on your smartphone and/or Apple watch and to define your user name so that you can customise **your history.**

< Back to Contents

D. MY ACCOUNT

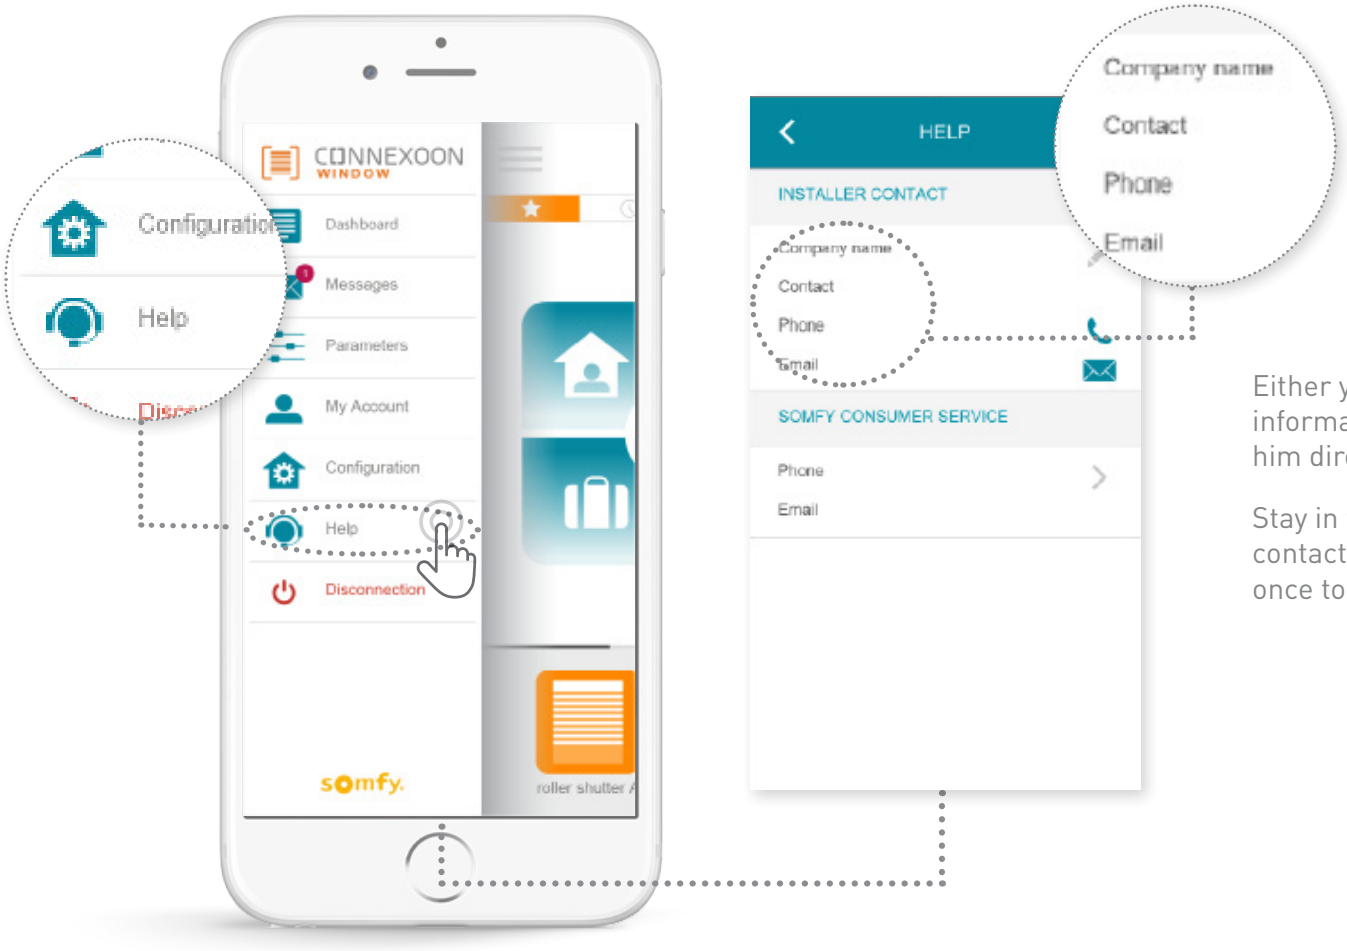

This tab contains the information you entered when you activated Connexoon.

Building happiness

< Back to Contents

E. HELP

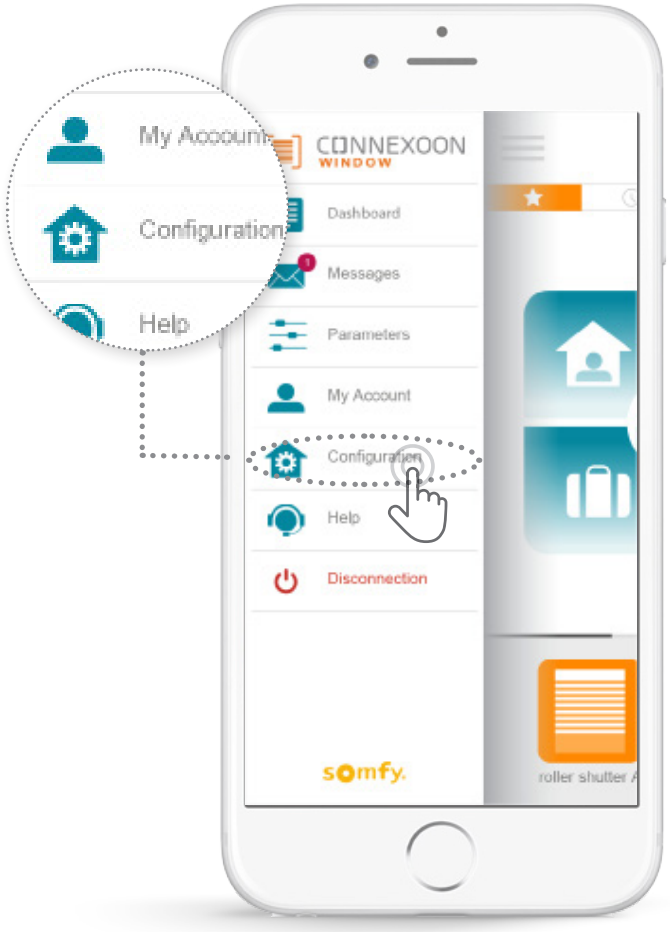

Either you or your installer may fill in the information in this tab so that you can contact him directly if you have any questions.

Stay in touch with the installer by entering his contact details in the application. Just press once to contact him.

5 ADVANCED INSTALLATION FUNCTIONS

< Back to Contents
