Roller Shutter
Motors and automated systems for roller shutters

Get the best out of your investment by motorising your roller shutters!

Motors and automated systems for roller shutters

All roller shutters can be motorised!
Whether you’re having a new house built or restoring an existing one, there is a Somfy motorisation solution to suit every type of roller shutter.

How is a motor installed?
The Somfy tubular motor is integrated into the cylinder around which the roller shutter is wound. It is powered by electricity or solar energy. It is operated either by a wall-mounted control unit, or by a remote control or automatic systems (programmer, sun or temperature sensor).

Somfy recommends...
Choose roller shutters fitted with new generation rigid links*:
- Reinforced with fibre glass.
- Come with Somfy electronic motors with effective anti-lifting resistance: up to 100 kg.
Economic and effective burglar resistance!

Exclusive Somfy functions which prolong the lifespan of your shutters:
- Obstacle detection
  Stops automatically if an obstacle is encountered to protect the shutter.
- Protected against freezing
  Stops automatically if the slats are jammed by freezing.
- Automatic settings
  Settings automatically maintained to ensure that the shutter continues to roll up fully and close perfectly, every time.
- Burglar resistant
  When lowered, the shutter withdraws attempts to open it from the outside. Security can be further improved by fitting the roller shutter with a lock.

Changing from manual operation to motorisation is so easy!
Your manual roller shutters can be motorised without changing everything. If you need a replacement or are having trouble with your straps or crank handles, consider motorisation and talk to your installer!

Remember to protect your roller shutters!
In the range of Somfy motors for roller shutters, Oximo and ilmo offer advanced functions which improve security and prolong the lifespan of your shutters giving you a better return on your investment. Ask your installer to advise you!

Your roller shutters can also be controlled by timers or sensors!
Your roller shutters can be made to operate without any action by you:
- At a time set by you
  > using the timer.
- According to the weather using outdoor and indoor sensors
  > but you can disable them and take over control at any time!

What you need to know about motorisation

Insulate your house more effectively both in winter and summer and save energy.

Enjoy all benefits of motorised roller shutters!

Motors and automated systems for roller shutters

Because security is essential!

With a single click, close all your roller shutters, without exception... and there’s no need to check your shutters individually.

ROOM REMOTE CONTROLS

Telis 1 RTS or Telis 4 RTS
Remotely control up to 5 roller shutters, separately or as a group.
- 1 channel or 4 + 1 channel radio remote control for centralisation.
- Up, down and stop functions and "my" favorite position.
- Available in 4 finishes: Lounge, Silver, Pure and Patio.

HOME REMOTE CONTROLS

Telis 16 RTS
New!
Operate your roller shutters by room, by floor, by façade... by creating up to 16 pieces of equipment or groups of equipment.
- Remote control to operate your roller shutters by creating groups within the same room or on the same façade, or by operating a single piece of equipment.
- Name each group with the simple, intuitive programming interface and find it easily on the remote control screen.
- Up, down and stop functions and "my" favorite position.
- Can be used to link other pieces of equipment.
- Low battery indicator.
- Available in 2 finishes: Pure and Silver.

Make people think you’re at home, while you’re away for a weekend or on holiday!

An effective way of discouraging burglars.

ROOM REMOTE CONTROLS

Telis 6 Chronis RTS
New!
Centralised remote control with timer.
- Manual mode: remote control to operate six items of equipment or groups of equipment. Centralisation function. Option to name each group and find it easily on the screen.
- Automatic mode: Remote control to programme each day of the week separately, with up to six time slots per day.
- Dusk function: programmed closing times are adapted according to the season.
- Automatic time adjustment.
- Presence simulation function: to simulate presence while you are out.

ROOM CONTROLS

Chronis Comfort RTS
General control unit with timer.
- Wireless programmable wall-mounted control unit.
- Option to programme each day of the week differently and select opening, closing and "my" favorite position.
- Programmed opening and closing times can be adapted according to the season.
- "Security" mode to simulate presence.
Enjoy all benefits of motorised roller shutters!

Save energy with Dynamic Insulation™ from Somfy.

How does it work?
In both summer and winter, Dynamic Insulation™ automatically controls motorised roller shutters using sensors and automatic systems.

**IN SUMMER**
As soon as sunlight hits the façade, the roller shutters close automatically, keeping the room cool and reducing the need for air conditioning.

**IN WINTER**
The roller shutters open automatically to make the most of the natural heat provided and reduce your heating bill.

The roller shutters close automatically as soon as night falls to trap the heat inside the house.

---

**Window Dynamic Insulation™**

**Chronis Easy RTS**
Wall-mounted wireless programmable control unit.
- Daily programming: the same opening and closing times for every day of the week.
- The timer programme can be disabled temporarily.

**Sunis Indoor WireFree™ RTS**
Wireless indoor sun sensor for one window.
- In summer, the shutter is lowered automatically once sunlight hits the window.
- In winter, the sensor can be disabled easily, leaving the shutter open to benefit from the sun’s free heat.

---

**Room Dynamic Insulation™**

**Chronis Smart RTS**
Wall-mounted wireless programmable control unit.
- Option to programme each day of the week differently.
- “Dusk” mode: programmed closing times are adapted according to the season.
- “Security” mode to simulate presence while you are out.

**ThermoSunis Indoor WireFree™ RTS**
Wireless indoor temperature and sunlight sensor for all roller shutters in one room.
- Intelligent insulation.
- In summer, the roller shutters are lowered automatically once sunlight hits the room.
- In winter, the roller shutters are either opened automatically to benefit from the sun’s heat, or closed automatically if the room becomes too hot.

---

**Home Dynamic Insulation™**

**Telis 6 Chronis RTS**
Centralised remote control with timer.
- Two operating modes, two main functions: the centralisation function and the timer function.
- Users can easily create, name and save up to six time slots in any given day.
- Can be used to create presence simulation scenarios, for added security.
- Energy savings in winter with the dusk function.
- Automatically changes between summer time and winter time.
- Available in two finishes: Silver and Pure.

**Sunis WireFree™ RTS**
Autonomous façade sun sensor.
- In summer, the roller shutters are lowered automatically once the pre-defined sunlight threshold is reached.

---

**PLUS THE VERY BEST IN COMFORT!**

**Visual comfort**
Guts down unwanted glare and reflections on TV and computer screens.

**Natural ventilation**
Use the programmable “my” function to place your roller shutter in the open slat position, providing air circulation while protecting your privacy.

**Décor protection**
Protect your floors, carpets, furniture and plants from the sun, keeping them fresher for longer.

**BENEFITS**
- Dusk mode.
- Presence simulation.
